A country can grow

THE SOUTHERN SERVES THE SOUTH

no faster than its railroads

It is recognized that the South today offers remarkable opportunities for the profitable investment of capital.

But, if freight service is to be adequate to care for the increased output of factories, mines, farms and forests, a very considerable part of this new capital will have to be devoted to railroad development.

Investors will naturally place their funds in securities yielding attractive and assured returns. The Southern Railway Company, like any other business, will have to bid for its funds in the general investment markets.

The ability of the Southern to obtain needed new capital will depend on its earning power and the rate of return it offers investors.
