### BACK TO NORTH CAROLINA

Carry me back to the dear old mountains of N. C.  
There's where the laurels bloom sweet in the spring-time.  
There's where the air is pure and free—  
Carry me back to old North Carolina—that's the home for me.

There's where the old mountain tops seems to rise,  
Far reaching to the blue blue skies.  
There's where when you need a friend, an helping hand the old acquaintances will lend,  
Back in old North Carolina.

Where e'er in the world you may stray,  
You long for that old mountain home some day,  
There's where the welcome is sent back to you.  
There's where hearts are strong and true.  
Back in old North Carolina.

There God sends to the soul peace;  
Blesses all you meet.  
In that happy little valley' neath those grand old hills—  
My thoughts turn back there still.  
Back to old North Carolina.

## WHAT A DIFFERENCE 90 DAYS MAKE!

TODAY A TODDLING CHICK... in 90 days a proud pullet about to lay. There's something to think about! Tiny bones and little muscles have grown several times in size... a delicate fuzz has sprouted into hundreds of feathers... a chick weighing grams has grown into a pullet weighing pounds... all in 90 short days!

A wonderful change... and only one thing can do it... good feed! This year consider Purina Startena Chow (mash) and Purina Chick Chow (scratch) or All-Mash Startena Chow for the first six weeks... and then Purina Growena and Purina Intermediate Hen Chow until your pullets are laying at 16 weeks.

Put these Chows before your chicks. You will see pullets that are built right... pullets that will lay eggs aplenty in fall and winter when eggs are always worth good money.

Lord Birkenhead, chairman of the Greater London and Counties Trust, Ltd., visiting America on business, said:

"A cheap and abundant supply of electricity is our aim. We feel that this will have a good effect upon British industry and alleviate the unemployment problem, and place Great Britain in a better position to compete in the markets of the world.

"The superpower system has enormously extended the area in which energy is distributable and rendered possible the interchange of service with other power stations."

Is it an accident that the relative national wealth of the United States as against Great Britain, is almost the exact relationship of the relative per capita horsepower ---three and one-half to one?
