

THANKSGIVING RECIPES TO HELP COOKS BE THANKFUL "PUNKIN PIE"

Speed Crust: 2 cups flour, 1 teaspoon salt, 1-2 cup corn oil, 4 table-spoons cold water (about). Sift flour and salt together. Stir in oil, using a fork or wire beater and add a little at a time distributing it well so that when stirred the result will be many small lumps. (Do not work up lumps as they make flakes when baked.) Add enough water to hold dough together. Turn out on well-floured board and roll half at a time. Do not chill, roll only once.

Filling: 2 cups canned pumpkin, 1-8 cups sugar, 1-2 teaspoons ginger, 1 teaspoon cinnamon, 1 teaspoon salt, 1 well beaten egg yolk, 2 cups milk, 1-2 cup canned coconut, and 3 stiffly beaten egg whites. Mix ingredients in the order listed folding in the beaten egg whites last. Bake for 10 minutes in a hot oven. Reduce the heat to moderate (325 F.) and bake 30-40 minutes longer. Makes 2 8-inch or 6 individual pies.

A FRUIT GOBBLER
Portion Salad: 1 strip pimiento, 1 pitted date, 1 small piece banana, 1 slice canned pineapple, 1-4 red candied pear, quartered lengthwise, or 1 red apple, unpeeled.

Place the pineapple slice on end to make the turkey's spread tail. Stand the apple in front of the pineapple. Place the section of banana (which has previously been marinated with lemon juice to prevent its turning brown) on top of the apple, to form neck of turkey. On this place the pitted date, and lay on top the strip of pimiento to make the "comb." Surround the gobbler with a nest of lettuce leaves and pass mayonnaise.

"THE TRIMMINGS"
Creamed Mushrooms: 1 lb. mushrooms, 1-4 cup corn oil, 2 table-spoons cornstarch, 1 teaspoon salt, pepper, paprika, 1-2 cups milk and mushroom stock, 1-2 cup cream, and bread cases or French Toast. Stem and pare mushrooms. Cover stems with cold water and bring to boil. Let simmer twenty minutes. Heat corn oil in heavy frying pan and cook mushroom caps in this on both sides. As soon as tender, about five minutes, sprinkle with cornstarch, add salt, pepper and paprika, and stir carefully with hot oil until well blended. Measure stock and add milk enough to make one and one-half cups. Add mushrooms, and stir over low fire until smooth and thick. Cook three minutes. Add cream, heat and serve.

CREAMY DESSERT SAUCE
3-4 cup corn syrup (butterscotch, maple, or caramel flavored), 1-4 cup cream or evaporated milk, 1-4 cup salted nuts.
Add cream or evaporated milk to corn syrup and bring to a boil. Boil two minutes. Garnish with salted nuts, and serve.

KITCHEN GOSSIP
Your child will drink his milk with less urging if you add two table-spoons corn syrup to each glassful. It doubles the energy value besides improving its taste.

KG
Unsweetened grapefruit is now being canned, so that those who suffer from diabetes may enjoy this popular fruit.

KG
Not from Gulliver's land are those giant dates you've seen in fancy shops. They're simply two dates pressed together before stuffing. You can make these "jumbo" dates yourself.

KG
For speed in oiling your pans and muffin tins, get a soft pastry brush, dip it in the corn oil we use for our nicest dishes, and brush the pans. Boil the brushes in soap solution once a week to keep them fresh.

KG
When you mix fruit cup, you know it's important the fruits shan't turn dark. If the canned grapefruit is put first into the mixing bowl it will form a protective covering for the apples, pears, bananas, etc.

KG
The oft-rejected carrot will taste as good as it looks if you cut the scraped carrots in halves, put in baking dish with a little salt, mace and oil, and pour in a half-cup corn syrup and a little boiling water. Bake 'til tender—and watch them disappear!

ADMINISTRATRIX NOTICE
Having qualified as Administratrix of the estate of Sarah A. Weil, deceased, late of Transylvania County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned at Brevard, North Carolina on or before the 13 day of November 1931, or this notice will be pleaded in bar of their recovery. All persons indebted to the estate will please make immediate payment.

This Nov. 13 1930.
MRS. LOTTIE DUCKWORTH,
Administratrix of the Estate of Sarah A. Weil, Deceased.

FERTILIZER TESTS COMPLETED HERE

Demonstration on Carl Allison Farm Proves Value of Fertilizing Corn

FROST AND DROUGHT RETARDED THE GROWTH

\$9.13 Profit Realized per Acre Where Proper Grade of Guano Was Used

(By J. F. Corbin, Agri. Teacher)
Results of the experiment run on the farm of Carl Allison to determine the most profitable amount and kind of fertilizer to use on corn are as follows:

The test had a very poor showing this time, due to certain weather conditions, and should be taken into consideration in studying results. Some of these factors were: Corn was killed by frost on last night of May, was replanted, extreme dry weather prevented fertilizer used from showing up in comparison to plots with no fertilizer, early frost prevented corn from maturing, and also corn was harvested a little green causing all plots to weigh more than they actually did, no check plots were used between plots causing some chance of error.

Sixteen plots were used with 1-10 acre in each plot. Half of each plot was limed but lime ends of field was high and dry which prevented any test.

Complete analysis of results would require too much space in a paper, but this material will be used extensively with all classes of men and boys. Some of the facts as shown by the test are: No fertilizer plots made 37.5 bushels per acre; next lowest yield was made where 200 pounds of 10-3-3 was used, making 41.71 bu. per acre; 400 pounds of 10-3-3 made 44.85 bu. per acre; 400 pounds of 0-3-3 made 46.71 bu. per acre; 400 pounds of 10-3-0 made 43.85 bu., which goes to show that nitrogen is needed in the formula as well as the others. Four hundred pounds of 10-3-3 made 51.28 bu. and gave a profit of \$9.13 per acre more than where no fertilizer was used after the fertilizer was paid for. This would be \$18,248.00 made money on 2000 acres of our corn land. The highest yield made was 54.28 bu. on the plot with 600 lbs. of 10-3-3. The most profitable plot was No. 16, using 400 lbs. of 10-3-3 made from Ammonia Nitrate-Calcium Carbinate, a new fertilizer made from the air.

The test shows that it pays to use plenty of good-high grade fertilizer even during a dry unprofitable year like this.

SCOUTS PASS MANY TESTS AT MEETING

(By SCOUT REPORTER)

Eight Boy Scouts passed a total of twenty-nine Merit Badges at the Court of Honor meeting held Monday, November 17. The members of the Court present were: Hinton McLeod, C. M. Douglas, Prof. J. B. Jones, Dr. C. L. Newland and R. H. Morrow. This Court of Honor meeting was held in connection with the regular weekly meeting of the Scouts, but will be on a different date in the future.

A count of the merit badges passed indicated that this meet holds the championship for the most badges passed at any one time in the history of the troop. The meeting coming next in rank for number passed, was only twenty-one.

A few of the boys who applied for merit badges had already passed a large number, while others were trying for the first time. Jack and Fred Miller are still working earnestly and faithfully regardless of the fact that they have already become Eagles and are far in advance of the other Scouts. Fred passed six very hard ones: The Hiking merit badge which takes three months to complete; Weather, one month; also Basketry, Photography and Animal Industry. Photography is extremely difficult and can only be gained by patience and hard work. Jack Miller passed Firemanship and First Aid to Animals—both are a valuable addition to the knowledge of any Scout.

Ralph Galloway, a hustling little Star Scout, came out with four tough ones: Handicraft, Horsemanship, Public Health and Animal Industry.

Richard Grimshawe, another Star Scout, completed Handicraft, Pathfinding, Scholarship, and Reading. Pathfinding requires that the applicant be familiar with the various streets, business houses, public buildings, homes and other important points in and around Brevard.

Hinton McLeod passed three merit badges. This gives him a total of thirteen. As soon as he passes Athletics he will be a Life Scout, which is the step next in rank to Eagle.

Craig Misenheimer became ambitious and passed two nice ones: Book-binding, and Firemanship. James Misenheimer made the grade for Swimming, one which is holding several larger Scouts back.

Mark Taylor Orr of the Silver Fox Patrol, passed eight; they were: Chemistry, Firemanship, First Aid to Animals, Animal Industry, Reading, Public Health, Personal Health, and Journalism.

Ralph Galloway is the only boy in the troop who holds the merit badge for Horsemanship. It is one which demands a good knowledge of horses, such as the riding aids, points of a horse, and methods of riding.

Several Scouts have been making extended tours into the Pisgah National Forest for Nature Study and Hiking. This reserve offers a splendid chance for Scouts to observe the various animals and other phases of Nature. On one excursion the boys noted 44 deer, on another 52, and on the last trip 88 topped the count.

LIGHT is SAFETY in your HOME

FIGURES from large insurance companies prove that personal injuries in the home are often the result of inadequate lighting. Unlighted hallways, dark stairways, dim rooms, all provide settings where accidents may easily occur. You can remove these sources of possible danger by providing easily accessible, convenient lighting in all dark spaces in your home.

LIGHTS properly placed will dispel the uncertain shadows that lead to accidents. And outside of your home, lights which may be controlled from inside the house will serve to guard against burglary and midnight marauders. You are adding safety to your home when you ADD-A-LIGHT.

This advertisement is part of the national ADD-A-LIGHT movement for improved home lighting.
