

## CATTLE NEED BEST ATTENTION JUST NOW

If They Are To Be Presentable At Fairs And Take Ribbons.

Even good animals must be properly trained and fitted for high placing in the show ring and owners should begin now to get the animals in good condition and train them to lead well and stand squarely on their feet.

"When shown the animal should carry just enough flesh to have a good, thrifty, slick appearance without any surplus fat," says J. A. Arey, extension dairy specialist at State College, "and this is not difficult if the animal receive good feed and care during the conditioning period."

Mr. Arey recommends a grain mixture of 30 pounds of corn meal, 30 pounds of crushed oats, 25 pounds of wheat bran, and 15 pounds of linseed or soybean meal as the grain ration. Where the animal is thin in flesh at the beginning of the feeding period a small amount of ready mixed molasses feed should be given in addition to the grain ration, he states.

When animals are to be shipped from place to place it is best to feed mixed hay as legume hay alone often upsets the digestive system of a show animal. Where the animal is shown only at a local fair, however, the regular farm ration can be continued.

Mr. Arey states that the animal should be clipped all over at least six weeks before the show if the hair is long as this will give time for the hair to grow and present a smooth, slick appearance. Where the hair is short, however, it is advisable to clip only the head, ears and neck, back to the shoulder vein, the tail setting and underneath the belly he says.

Brush and rub the animal thoroughly every day. This stimulates the circulation and improves both the hide and hair. Wash the animal once a week.

In washing the animal use plenty of soap and water and do not spare elbow grease, advises Mr. Arey.

### STATE SHORT IN GRAIN AND HAY

The protracted drouth this summer has materially lowered the production of all grain and hay crops even though the acreage for most crops was larger than that planted last year.

"To feed its three million population and all livestock, North Carolina needs to produce fifty million bushels of corn," says C. A. Sheffield, assistant director of extension at State College. "Forecast by the U. S. Crop Reporting Board gives the production this year at 35,520,000 bushels of approximately 15 millions bushels under the apparent needs."

The production of wheat is also one million bushels short of last year and other grain crops, such as oats and barley, show a considerable decrease over 1931 yields.

Mr. Sheffield states that while there were 26,000 more acres planted to hay crops in 1932 than in 1931 the indicated production is 175,000 tons less than that of last year. With this existing shortage, farmers in North Carolina must either buy feed and hay, sell the livestock, or grow some winter grain and hay.

Mr. Sheffield also states that feeding imported grain and hay is poor economy due to the high freight rates which often equals the purchase price. He therefore advises farmers to grow winter grain and hay crops for winter and spring feeding.

Both barley and oats are splendid grain crops and can be grown successfully on most North Carolina farms. Barley is equal in corn in feed value and the yield is, on the average slightly better than corn.

"Heavy plantings of these two crops together with a good acreage sown to oats and barley and vetch or Austrian winter peas and clovers for pasture would keep several million dollars in the State that would otherwise go out for the purchase of corn and hay," says Mr. Sheffield.

### NOTICE OF FORECLOSURE

Under and by virtue of the power of Sale contained in that certain Deed in Trust from A. C. Garren and his wife, to D. L. English, Trustee, bearing date of July the 23rd, 1929, registered in Book No. 23 on Page 83 of the Record of Deeds in Trust for Transylvania County, N. C., securing certain indebtedness therein named and default having been made in the payment of said indebtedness whereby the Power of Sale contained in said Deed in Trust has become operative and all notices required as to said default having been given and said default has not been made good and the holder of the note evidencing said indebtedness having demanded of the undersigned Trustee the foreclosure of said Deed in Trust;

NOW, THEREFORE, the undersigned Trustee will, on Monday October the 10th, 1932 at 12 o'clock M. at the Court House door in the Town of Brevard, N. C., offer for sale and sell to the highest bidder for cash the following described property to-wit:

Lying in the Town of Brevard, on the South side of French Broad Avenue, being all of Lot No. 6 of the J. A. Galloway tract of land, reference being hereby made to said Deed in Trust for a description of said land by metes and bounds.

The proceeds of said sale to be applied upon said indebtedness, cost of sale etc.

This 9th day of September, 1932. D. L. ENGLISH, Trustee. Pub. Sept. 15-22-29 Oct. 6

Eight registered Jersey bulls have been bought by farmers in Chatham county this year, reports County Agent H. M. Singletary. Scrub ani-

## FIRE PREVENTION WEEK IN OCTOBER

Beginning with the 1932 Fire Prevention week, let us determine to cut the American fire waste, which runs about \$500,000,000 a year, in half.

That is the suggestion in an article in Safeguarding America Against Fire. The American people could take upon themselves no finer project. In that seems a small matter in the light these days of distress, a half-billion-dollar waste is unthinkable, and even of the fact that fire destroys 10,000 lives annually.

This year fire prevention week will be observed from October 9 to 15. It will open with proclamations from the President of the United States and from governors of states, mayors of cities and other officials. Chambers of Commerce, fire departments, trade associations and state fire prevention groups will give every effort to instructing the public in fire hazards and their elimination. Each of us will have the chance to learn, pleasantly and painlessly! If we fail, we have shirked a duty to the community.

Every fire reaches into every pocketbook—threatens every piece of property in the community—endangers every life. It is a tragic, an unnecessary waste. It is only made possible by thoughtlessness, laziness, and ignorance. It can be stamped out by thought and care. Do your part!

Cold storage seed for fall planted Irish potatoes in Chowan county gave an 88 percent germination as compared with the germination of from 2 to 50 percent on those seed treated with Ethylene. The test was conducted by County Agent N. K. Rowell.

### NOTICE OF SALE OF LAND

Under and by virtue of the power of sale contained in a certain Deed of Trust executed by W. L. Townsend (Unmarried), dated October 22, 1928, and recorded in Book 22, Page 538, in the office of the Register of Deeds for Transylvania County, North Carolina, default having been made in the payment of the indebtedness thereby secured, and demand having been made for sale, the undersigned Trustee will sell at public auction to the highest bidder for cash at the Courthouse door in Brevard, N. C., at Twelve o'clock noon, on the

3RD DAY OF OCTOBER, 1932, the following described property, located in Transylvania County, North Carolina, in Boyd Township.

Tract No. 1 Being a part of the John Morgan tract of land. BEGINNING on a stone on top of a hill, Townsend's corner, and runs S. 46 poles to a stone; then East 82 poles to a stone; thence North 24 poles to a stone; thence N. 57 deg. W. 26 poles to a stone; thence N. 45 deg. E. 59 poles to a white oak on the bank of the Big Branch; thence up and with the meanders of the said branch 44 poles to a spruce pine; thence W. 72 poles to a stone originally a pine; thence S. 10 1/2 deg. W. 25 poles to a stone; thence S. 2 1/2 deg. E. 34 poles to a stone; thence S. 13 1/2 deg. E. 18 poles to a white oak; thence S. 55 deg. W. 20 poles and 20 links to the BEGINNING, containing 64 1/2 acres, more or less. Being the same land conveyed to W. L. Townsend by deed recorded in Book 18, Page 408.

Tract No. 2 BEGINNING on a stone, M. E. Fowler's S. E. corner, and runs N. 2 deg. E. 71 poles to a stone; thence W. 82 poles to a stone in Townsend's line; thence S. 2 deg. W. 71 poles to a stone; thence N. 88 deg. E. 82 poles to the BEGINNING, containing 36 1/2 acres, more or less. Being the same land conveyed to W. L. Townsend by deed recorded in Book 18, Page 407.

Tract No. 3 Adjoining the lands of Millers, Deavers, Townsend and others. BEGINNING at a Spanish Oak, Beck's corner and runs North 188 poles to a stake in a branch; thence West 2 poles to a stake in Miller's line; thence South 35 deg. West with Miller's line 50 poles to a stake in Deaver's line; thence with Deaver's line East 35 poles to the Deaver's Northeast corner; thence with Deaver's line South 150 poles to their Southeast corner; thence with Deaver's line West 70 poles to a stake in said line; thence South 6 poles to a stake in Townsend's line; thence East 90 poles to a stake; thence North 6 poles to the BEGINNING, containing 34 acres, more or less. Being the same land conveyed to W. L. Townsend by deed recorded in Book 41, Page 111.

EXCEPTIONS There is expressly excepted from the operation of this conveyance, and out of tract No. 1 above, the following: BEGINNING on a stone in the line of David Sims, being W. L. Townsend's corner, and runs South 17 poles to the road; then with said road North 35 deg. West 13 poles to a stake; thence North 44 deg. West 16 poles to a stake; thence North 13 deg. East 6 1/2 poles to a stake in Sim's line; thence with the same South 57 deg. East 20 poles to the place of BEGINNING, containing 130 square rods, be the same more or less. Being the land deeded by W. L. Townsend and wife (deceased) to R. E. Townsend by deed recorded in Book 51, Page 531. There are also excepted from the operation of this conveyance any rights as to the public road through said premises.

This, August 26, 1932. NORTH CAROLINA BANK & TRUST COMPANY, TRUSTEE. Successor to ATLANTIC BANK & TRUST COMPANY, TRUSTEE. J. S. DUNCAN, ATTORNEY. Pub. Sept. 1, 8, 16, 22.

Animals are a thing of the past in the county, he states.

## THE PRAYER CORNER

(From the files of long ago)

### "AGREEABLENESS"

I feel deeply moved to share with my readers some thoughts that came to me in my reading from a writer whom I greatly admire. There is so much COMMON SENSE in what he says, especially his words on AGREEABLENESS.

"If you are looking for a job, it may interest you to learn what is the one quality which employers the world over want most.

"It is AGREEABLENESS. "Agreeableness is the diamond among virtues, for it is the most precious and rarest of all.

"It is worth money; for it sells more real estate, groceries, dry goods and automobiles, typewriters, furniture, and life insurance than any amount of smooth talk, and convincing arguments.

"Just be pleasant, and you can walk away with a contract right under the nose of the man who knows it all.

"SMILE, not once in a while, so that you look like it hurt you when you force a grin, but get the habit. Smile to yourself when you're shaving. Then it will come natural when you use it trying to sell a washing machine.

"BE AGREEABLE! And you will be in demand. For in every walk of life they are crying for the agreeable person.

"Every wife wants that kind of a husband; husbands that kind of a wife; children want agreeable parents; the workman an agreeable boss; the boss an agreeable workman, and everybody wants agreeable relatives.

"We want agreeable hired girls, hotel clerks, motormen, policemen, janitors, ice men, ushers, preachers, governors, and bankers.

"Come, be agreeable, for you will have little competition, and are pretty sure to succeed.

"An agreeable person lights up the room like a lamp.

"He is like love when you're lonesome, bed when you're tired, a breeze when you're stifling, food when you're empty, and money when you're broke.

"Be agreeable. Study to make people like you. Make love to the world.

"Life's a mix-up any way, that none of us understand. There are all

sorts of inexplicable thorns and tragedies, buffets and chagrins, and most people are a bit sorry for themselves. Hence ugly."

"BUT YOU — YOU BE AGREEABLE. TRY IT AND SEE WHAT HAPPENS."

### A PRAYER

Blessed Jesus, help us to make Religion a thing so beautiful that all men may be won to surrender to its power. Let us manifest in our lives its sweetness and excellency, its free and ennobling spirit. Forbid that we should go up and down the world with melancholy looks and dejected visage, lest we should reveal men and women from entering Thy Kingdom. Rather, may we walk in the freedom and joy of faith, and with Thy new song in our mouths, so that men looking on us may learn to trust and love Thee.

We can give Thee nothing of our own. All that we have is thine. Oh, then help us to glorify Thee by striving to be like Thee. Make us just and pure and good as Thou art. May we be partakers of the Divine Nature so that all that is truly human in us may be deepened, purified and strengthened. And so may we be witnesses for Thee, lights of the world reflecting Thy light.

As we go among our fellows, may we ever manifest a patient temper, a kind and happy spirit, a love that BEARETH ALL THINGS, ENDURETH ALL THINGS, BELIEVETH ALL THINGS.

We entreat Thee, O Lord, to remember Thee in our daily work. Let us do it heartily as unto Thee, and not unto men. Grant that our tasks may be congenial to us, that we may give ourselves wholly to them. Consecrate all our powers of mind and body to Thy service.

Give us enthusiasm, a fervent spirit, a cheerful, hopeful temper, so that we may do our work with ease and self control, not with idle worry, or fruitless fear. Let us not think too much of our rights, but always our duties, and when we have done all, then let us say, "We are unprofitable servants." And when Thou drawest the curtain of night upon our labour, give us the sweet gift of sleep. All this we ask for Jesus sake. Amen.—C. D. C.

## FASHION ARTICLE

(By Special Arrangement Between this Paper and Harper's Bazaar) Paris Imports

Cargoes of French models are landing on these shores every day now. They are being unpacked and hurried to the shops and so the reports which we have all been studying earnestly for weeks come true. A delightful, young evening dress by Louiseboulanger is made of a black crepe with a jacquard figure. The sash, red and blue, winds spirally around the fitted body of the dress. On the shoulders are piquant ruffles of the black material, under the one a second equal ruffle of the red, under the other, blue. Little novel sleeves appear on many evening dresses, as the American designers foresaw in their collections that they would. Loucile Paray has made a dark blue corduroy evening dress (and there are heaps of corduroy evening things) with tiny shoulder sleeves made entirely of white organdie petals. In a white corduroy evening frock, Maggy Rouff has set fringe sleeves, the fringe caught into festoons. The clothes have many whimsical touches like this, ribbon loops, unexpected flower trimmings, and so forth. Mainbocher creates a pristine white gown of a novel thin crepe Elizabeth with a fine rib, which has a line of large white cabbage roses in a garland, diagonal across the bodice from shoulder to hip.

The bistered satins are among the many interesting new materials. For people who adore satin and would not feel that the winter wardrobe was complete without a dress of it, this is a find. It has the charm of the plainer satins and the novelty of this season. Patou has made one of his long-waisted, mediaeval gowns of it in his tearose shade. This is accented by a wide belt, set low, in a coppery rictal and there a necklace to match it. It is interesting to note that this much-discussed line is entirely flexible. It would be perfectly simple to slide the belt up to exactly the point where it felt and looked best on you. The bodice is cut so slimly and neatly that the dress does not blouse, above the belt, indeed could not, for the girdle is worn very loose.

### Bare Backs

Dresses that are demure from the front are often startling décollete in the back. Paquin, for example, makes a gracious, conventional gown of black butterfly lace. Conventional, that is, until the wearer turns. Then you see that the back is devastatingly low and that the fullness of the skirt, and slip swings up and the gown is transparent almost to the knees in the back. Knees. Fancy that! After the conservatism which has marked our evening skirts the last few years. The opposite side of the medal is the prevalence of trains. Many of the new dresses have them. It remains to be seen how many of the copies will reproduce them. They are fragile, tricky to walk in and exceedingly ungraceful if they are not deftly handled. Bagheera and other unusual velvets are ubiquitous. Many daytime dresses, whether they are of velvet or not, show frequent velvet sleeves. Lyons velvet makes charming, stiff, puffy sleeves.

## FARM QUESTIONS

Question: My cowpeas and soybeans show very little growth and in many spots have died. What is the cause of this and what can I do to correct this trouble?

Answer: The cause of the plants failing to show good growth and dying in isolated spots is the dry weather and the resultant hard soil. The extreme dry weather this year has caused many crops to fail and some of them to die where the soil was hard. Due to this condition the roots could not grow deep enough to maintain contact with the lower water table and the crops made poor growth.

Question: Will the use of electric lights with my chickens during the fall and winter months give greater egg production?

Answer: Much investigational work has been conducted along these lines during recent years and uniformly good results have been obtained. The use of lights will increase the working hours for the flock which will bring a greater consumption of feed and a corresponding increase in egg production. While eggs produced in this way are often used for hatching, this practice is not recommended as the chicks will, as a rule, be weak and subject to all poultry ills.

Question: At what rate and at what time should nitrate fertilizer be applied to Chrysanthemums?

Answer: If the soil is made fertile at the time the plants are set it is not necessary to apply any additional plant food until the flower buds are formed. When the buds are formed nitrate of soda or sulphate of ammonia may be applied as a top dressing between the rows at the rate of one ounce to each square yard of soil. This should be thoroughly worked into the soil. A light mulch, one or two inches thick, of fresh cow manure may also be used. If this is used the plants should be watered as soon as the mulch is applied in order to soak into the soil the available plant food. With the commercial fertilizers, light applications of about one ounce to the square yard should be made every two or three weeks until the flower buds begin to show color.

## DO YOU LONG FOR THE GOOD OLD DAYS

We often hear people speak of the good old days and it is not uncommon to hear some one express a wish for their return. The good old days. What were they? They were the days before the electric lights came, when the only illumination was a flickering, smoky, dripping candle. They were the days of log houses with fire places that never warmed the room as do the furnaces of today. They were the days before the telephone, the automobile, the talking machine and the wireless. They were the days when it took hours to get a doctor over undrugged roads. They were the days when—but what is the use of going further? When we hear a wish expressed for the good old days somehow we can't join in. We wouldn't trade a second hand Ford for all the fun grandd had.—Ex.

## CARE OF TEETH OF GREAT IMPORTANCE

There is a vital relation between the mouth and systemic disease. Eighty-five per cent of the children in the public schools of the State have unhealthy mouths and need dental attention, according to the Division of Dentistry of the State Board of Health. When we realize that all the food that goes into the child's stomach must pass through his mouth, then we see the necessity of the child having a clean mouth.

A State School Dentist, connected with the State Board of Health is in Transylvania County for a period of four weeks for the purpose of putting on a Mouth Health Education program. During this time the school dentist will teach Mouth Health, with the aid of plaster models, chalk drawings and charts, and will work in the mouths of as many children as is possible, first showing them their mouths in a mirror, correcting the defects by cleaning, filling and extracting, and again showing the child his mouth after the defects have been corrected. This we call teaching by example, or "visual education," which is the most powerful of all teaching.

It will be impossible in the length of time the school dentist will be in the county to do all that every child needs. In fact, it is not the purpose of the program. The purpose of the program is to teach Mouth Health. Due to the limited time in the county, numbers of children will have their mouths examined and will be referred to their local dentist for dental correction. Insofar as possible every child in the grammar grades will have his mouth examined by the school dentist and the parents of those in need of immediate attention will be notified through the mail. In case you receive such a notice we hope you will consider it of sufficient importance to take the child to your family dentist because children with broken down teeth and gum boils are sick and cannot do the same work in school as if they were well.

## GEN. PERSHING TO SPEAK AT REUNION

General John J. Pershing, Major General Edward M. Lewis, Major General John F. O'Ryan, and Hon. Patrick Hurley, are among the distinguished veterans who have been invited to speak at the Thirtieth Division Reunion which meets in Knoxville September 28-29, on the 14th anniversary of the Breaking of the Hindenburg Line.

All veterans who served with the Division are invited to be at the reunion, and it is optional whether the veterans wear uniforms or not.

Free admittance to the East Tennessee Fair, which will be in progress at the time, has been arranged for

### NOTICE

September 10th 1932. S. M. Barton of Brevard Township, Transylvania County, N. C., returns as stray, One south down ewe one or two years old marked as follows: Swallow fork and underbit in the right ear, one half crop in the left ear. Filed Sept. 10, 1932. Jess A. Galloway Reg. of Deeds.

## SCHOLARSHIP NOW OFFERED MEMBERS

Boy Or Girl Making Best Record In Calf Club Work Wins Prize.

A two-year scholarship in Agriculture at State College will be awarded at the State Fair this fall to the boy or girl making the best record in calf club work during the past two years.

"To win this prize the club member must have completed two or more years of calf club work and must be under 21 years of age on September 21," says L. R. Merrill, State Club Leader. "The winner must also exhibit his animal at the Fair this fall."

In selecting the winner the judges will be governed by the following rules: financial gain, 30 points; dairy management, 10 points; other club activities, 10 points; type and condition of animal at time of showing, 35 points; and showmanship, 15 points.

Mr. Harrill states that all competitors must have records on all work completed during the two year period. These records must be certified by the county agent or teacher under whose direction the work was completed. It is also desirable that the member be interested in other phases of club work, he says.

The scholarship is offered by the Accidental Life Insurance Company in recognition of successful work and in an effort to encourage the production of high grade dairy cattle in the State. The winner must enter State College not later than the fall of 1933.

Club members who are interested in this should get in touch with their county agent at once so that all records can be completed and the animal put in good condition for showing, advises Mr. Harrill.

all veterans, who register at reunion headquarters.

Features of the reunion will be a program including a mammoth fireworks display of the breaking of the Hindenburg Line, a parade, and other exercises.
