When Sir Arthur Conan Doyle created the character of 8 HOLMES he founded an absolutely unique type and reconstructed theory and nature of detective stories. Heretofore such tales ha largely to "dime novel literature." Doyle made his famous detec-ductive genius, and the style and nature of his adventure set if world to talking. When the author ceased at last HOLMES stories there arese a universal demand for talking. When the author 'ceased at last to write S

annals of so-called light literature.

Sir Arthur Conan Doy's has written, by special arangement, a anal series of the ADVENTURES OF SHERLOCK HOLMES, for has received the highest price ever paid for such literary work. These stories have achieved a great success—the greatest perha-

annals of so-called light literature.

This great success was, of course, due in part to the fact the thirteen ales comprising the series are the last Sherlock Holmes stories that will ever be written. Thousands of people have grown to regard Holmes almost as a personal triend, and they would not willingly miss reading a single one of its adventures, the more especially as the present SHERLOCK HOLMES atories will be followed by no others. "The Return of SHE SLOCK HOLMES stories will be followed by no others. At the conclusion of the series he will become but a memory. On this point Sir Asthur is firm—he will write no more SHERLOCK HOLMES stories, now or later.
