

**Macon-Jackson Club Meets at the University**

Chapel Hill, N. C., April 4.—The Macon-Jackson County Club held its first meeting for the spring term, Friday night, April 4th, in the county club room of the Y. M. C. A. This was the best meeting ever held by the boys of Macon-Jackson County. The club was called to order by President Perry, of Jackson County. All of the boys from the two counties boasted of the fact that they were from Western North Carolina. Each speaker brought out the fact that he was proud that he was born and raised in the sunny hills of Western North Carolina. No doubt but that the good spirit which was shown between the two counties that night, and their brotherly love for each other, and for Macon and Jackson counties, will last forever.

The large number of boys from Macon and Jackson counties are specializing in the following professional schools here, namely: Law, Medicine, Commerce, Chemistry, Education, and the Ministry.

A large table was covered with all kinds of good eats. After a fine talk by the President, Mr. Berry, Mr. C. L. Fouts gave a report for the treasurer. The Macon-Jackson County Club has its picture in the Yackety-Yack. The meeting lasted for three hours, and each one said that it was the best meeting that he had ever attended.

The Macon-Jackson County Club will give another smoker April 10th, in honor of the boys and girls from Macon and Jackson counties who will be here for the State high school debate for the winner of the gold loving cup. All the boys of the club are greatly interested in the welfare of Western North Carolina. We are all more than glad to help in any way possible the boys and girls who are finishing high school this year. We want to help you to find your place in college, and if any one would like to have us help you in any way possible, we will be glad for you to write to Mr. C. C. Poindexter and C. L. Tallent.

**APPLES.**

The prospects are good for a full apple crop this year.

When there is a large crop only the very best can be sold to an advantage. So it is necessary that the orchardist who expects to sell good fruit for a high price should not neglect to spray well at the proper time. The two most important sprays should be given within the next few days.

The first spray should be given after the pink of the blossom shows and before it opens. This is to kill germs that cause injury to the fruit and leaves. One gallon of concentrated lime-sulphur solution to fifty gallons of water should be used. The second spray should be given after the petals of the blossoms have dropped and before blossom end of the little apple has closed—generally a period of from five to seven days. For this spray use one gallon of concentrated lime sulphur solution and one pound of arsenate of lead with fifty gallons of water.

If you need further information on spraying or help in getting spraying outfits or spray materials your county agent will gladly help you.

**YOU CAN'T KEEP FARMERS DOWN**

Why is it that Farmers keep right on being successful in the fact of adversity?

It is not "luck." It is the use of plain horse sense, enduring pluck, and hard work.

His horse sense leads him to buy the most modern implements obtainable. His pluck and his hard work enable him to use them to best advantage.

We are showing a wonderful line of modern implements for the farmer. They are the means of wresting success from adversity, and the price is within the reach of all.
