**Juries of Farmers To Pass Verdict on Scrub Sires**

An outline for conducting scrub-sire trials, recently prepared by the United States Department of Agriculture, has been distributed to practically every State in accordance with several hundred requests. While county agents plan to conduct most of the trials, a surprisingly large number are being planned by school superintendents, livestock organizations, business men, debating societies, creamery organizations, livestock breeders, agricultural officials of railroads, county farm bureaus, and, in one case, by a silo manufacturer.

Judging from the plans outlined, many trials will be conducted before juries of farmers, in connection with county fairs, agricultural clubs, and farmers' picnics, although most of them will be staged as independent affairs. In a Minnesota locality the fate of the scrub sire will be decided in a town hall debate.

Copies of the outline may be obtained on application to the United States Department of Agriculture.

**Motor Vehicles Contribute A Fifth of Highway Income**

An analysis of the various sources of highway funds since 1914 made by the Bureau of Public Roads of the United States Department of Agriculture shows that there is a marked tendency to collect a larger proportion of highway funds from the owners and users of motor vehicles. In 1914, out of a total highway income of \$240,262,784, the collections from motor vehicles amounted to \$12,382,031, or 5.1 per cent of the total. In 1921, seven years later, the motor vehicle owners and operators paid \$118,942,706 in motor vehicle fees and \$3,685,460 in gasoline taxes, which together equaled 10.6 per cent of the total income for highway purposes. A similar compilation of payments made by owners and operators of motor vehicles for licenses and permits in 1923 shows a total contribution on their part of \$188,970,992. In the same year gasoline taxes levied by 35 States amounted to \$36,813,939. The motor vehicles, accordingly, contributed a total of \$225,784,931, or 19.5 per cent of the entire 1923 highway income. In the six New England States this contribution is 25.1 per cent. This increase is accounted for by the increase in the total number of vehicles registered and in the change in the average payment per vehicle, which has risen from \$11.70 in 1921 to \$15 per vehicle in 1923.

A very substantial part of the total highway income, 38.1 per cent, was derived from the sale of bonds, both State and local. General property taxes contributed less than half the highway income, or 44.4 per cent. This means, worked out in another way, that of every dollar collected by the States, counties, cities, townships, and other taxing districts, only 12.4 cents was used for highway purposes. The average annual expenditure per person per mile of road all over the United States is only 0.0054 cent—1 cent for each 200 miles of road. This ranges from 0.0015 cent in the west North Central States to 0.0101 cent per person per mile in the Pacific States.

**Dismissing Him Gently.**

The head of a large shop, while passing through the packing room, observed a boy lounging against a case of goods and whistling cheerily. The chief stopped and looked at him.

"How much do you get a week?" he demanded.

"Five dollars."

"Then here's a week's money; now clear out."

The boy pocketed the money and departed.

"When did we hire that boy?" the chief inquired of the department manager.

"Never," was the reply. "He had just brought a note from another firm."—The Christian Evangelist.

**Kick Out Politics.**

Headlines in newspapers say there will be a fight for tariff reduction on sugar.

Why should there be any fight? Why should not our tariff experts find out exactly what protection various American industries need to operate and meet foreign competition on a basis of equality? Why should there be any fight about a business proposition such as this which is a question of "fact," not of "theory?" The workers suffer most from playing politics at their expense.—The Manufacturer.

Five reasons why we can sell same goods for less money:

1. We bought this merchandise last summer in large quantities when prices on Fall and Winter Goods were at the lowest point.
2. We buy Shoes direct from the manufacturer. This cuts out the middle man's profit.
3. We buy Dry Goods from the East, where prices are always lowest.
4. We are located one mile from Prentiss with practically no overhead expense, such as high rent, clerk hire, electric light bills, water rent, town tax, and so on.
5. We sell 'em for cash. A small profit and quick turnover is better than a big profit and long credits.
