

Galli-Curci Swayed by the Seer of Sweden

Emanuel Swedenborg, Scientist and Theologian
Amalia Galli-Curci
Clarence W. Barron, Financial Authority

Prima Donna Gives Wonderful Interpretation of the Writings of Emanuel Swedenborg—

HENRY FORD'S Dearborn Independent publishes a remarkable article on Galli-Curci and Emanuel Swedenborg, by Clarence W. Barron of the Wall Street Journal, the world famous financial authority. Mr. Barron declares that Galli-Curci has the most wonderful brain he has ever met or heard of in a woman, although she is much more "a true woman with a life and soul of affection for all that is ennobling and uplifting in the family, and in color, form, and music."

Mr. Barron is chairman of the Rotch Trustees, who acting under the will of Lydia S. Rotch of New Bedford, Mass., began in 1872 a modern translation of the Theological Works which Emanuel Swedenborg wrote and published in the Latin tongue, and deposited in the libraries of the world 150 years ago.

This work was completed and published by the Houghton Mifflin Co. in 22 volumes in 1907.

About three years ago there appeared in a Cleveland paper a paragraph that among her other accomplishments Galli-Curci had read all the Theological Writings of Emanuel Swedenborg. The claim seemed so absurd to Mr. Barron that he thought it might be easily punctured by a simple inquiry as to the edition.

The Bible a Greater Work Than Ever

To Mr. Barron's direct inquiry Madame Galli-Curci promptly replied: "Yes, I have read in the past year the complete Swedenborg Works, in fact it is the Rotch Edition of the Houghton Mifflin Co. that I have."

"I can say certainly that the Bible to me is a greater work than it was before."

Mr. Barron says: "My astonish-

ment was intensified. Familiar over many years with Swedenborg's general theological writings, I had set out to read the entire thirty-two volumes preparatory to an advertising campaign for the sale of this edition. Reading a few pages each day I finished my self-imposed task in fourteen years. I shall probably finish a second reading, at my present rate of progress, in perhaps ten years. Was it possible that a woman with no previous knowledge or relation to these books had really intelligently read them within a year?"

Swedenborg's Writings

Mr. Barron continues: "As an economist writing state papers on weights, measures, coinages and currencies, Swedenborg is easily comprehended. As an engineer transporting ships overland he is easily visualized. As a government official in the great mining industry of Sweden, writing practical books on mining and smelting, declared to be the foundation of modern metallurgy, he is of interest in the encyclopedia of scientific history. As the writer of volumes—original studies in search for the human soul—he is not without human interest."

"But when one comes to the realm of the unseen, where there is neither time nor space upon which to rest mental conceptions, few may enter into the fullness of the revelation which has come into the libraries of the world through Emanuel Swedenborg."

"Think of twenty modern-sized volumes, originally written in the Latin tongue and unfolding from the Hebrew of 'Genesis' and 'Exodus' the internal or spiritual sense, that lies

Fords climb hills better with this new oil

Road tests prove it.

ROAD tests over approximately a thousand mile course with dozens of Fords, both passenger and truck, proved that the new "Standard" Motor Oil makes Fords climb hills better; gives from 10% to 20% increase in gas mileage and a reduction in oil consumption of 12% to 40%; affords better lubrication at all times, with a cooler motor, smoother operation at all speeds and little or no carbon accumulation; relieves gripping bands.

Test the new "Standard" Motor Oil yourself. Verify these results in your own car. Just get your crank-case filled at any "Standard" Service Station or dealer. Then expect results. You can actually feel the difference.

7 Advantages of "Standard" Motor Oil

1. Constant lubrication.
2. Minimum friction.
3. Less "breaking-down" under load or at high speeds.
4. More miles per quart of oil.
5. Better hill climbing—smoother operation.
6. Negligible carbon.
7. Actual saving in gasoline.
