

THE DAIRY COW AS A MARKET FOR HOME-GROWN GRAINS

As a rule, with a fair type of dairy cow, it will pay the farmers to feed in addition to the average pasture a small grain ration. Especially is this advisable at this particular time, because it will provide a market for home-grown grains such as corn, and should return more money in the form of dairy products than can be secured for the grain at the present prevailing prices.

When we consider the fact that grass contains a relatively high per cent of protein, it will not be necessary to include but little cottonseed meal in the summer dairy ration. Therefore, it is recommended that a mixture as follows be fed while cows are on the pasture:

- 100 pounds corn meal
- 50 pounds cottonseed meal
- 100 pounds wheat Bran or ground oats.

Figuring the above ingredients as follows: Corn \$1.00 per bushel, cottonseed meal \$37.00 per ton, wheat bran \$43.00 per ton, produces a dairy ration costing around \$38.40 per ton.

From 3 to 5 pounds of this mixture should be fed to each milk cow per day. Where the pasture is fairly adequate and where the grass is short, one pound of the above mixture to each three pounds of milk produced,

is recommended. This feed mixture composed largely of home-grown grain should give satisfactory results from the standpoint of providing a market at a high price in the form of butter fat and also will eliminate the necessity of paying high prices for commercial dairy mixtures.
 LYLES HARRIS, County Agent.

Ellijay Locals

Mr. Jacob Henry and a force of hands are making improvements on the road near the postoffice.

Mr. Grady Mashburn had the misfortune of losing one of his horses a few days ago.

Rev. Martin filled his regular appointment at the Ellijay Baptist church Sunday.

NOTICE

All persons who have neglected to list their property are hereby notified to meet the undersigned Tax Assessors at the following places:

Friday 27 and Saturday 28.

Failure to list your property subjects you to be chargeable with twenty-five per centum in addition to your other taxes, besides being guilty of a misdemeanor. This is positively the last chance to list without extra expense.

See Section 73 Machinery Act, 1927, page 149.
 J. P. MOORE, Assessor.

High in Quality—Low in Price

Motorists are beginning to learn that there's a big difference in tires, although they all look pretty much alike.

Some are made with skimpy, short staple cotton. Some have an overdose of "filler" in the rubber of the tread. Some are long on looks and short on quality.

But you won't need a microscope to be sure that the Good-year Tire you get from us is a real buy. Goodyear mileages tell the story.

Goodyears are performing so satisfactorily for our customers that they invariably come back—not with a kick but with a boost, and for another Goodyear when they need tire equipment.

We have your size—in fresh, new stocks. We are now completely equipped to do washing, polishing, vacuum cleaning, alemiting. Come to us for your gasoline and oils.
