County Budget

Preparation of a budget that will take care of the needs of each county department and activity and stand public inspection in the courthouse and in the county newspaper is the present task of the county officials throughout the state under the new County Fiscal Control Act.

Preliminary budget estimates are now being prepared on forms already sent out from the office of the County Government Advisory Commission by the department heads and officers in charge of functions in each county. These estimates must be completed and presented to each county accountant by June 1.

These preliminary budgets will show in detail what the department spent last year, an estimate of what it will spend this year, and what it expects to spend during the year beginning July 1.

Based on the figures submitted to him by the department heads, the county accountant will prepare a budget estimate for the entire county and submit it to the county commissioners not later than the first Monday in July, when the budgets will be finally fixed for the year on the basis of the county's income.

Under the new law all counties will use the uniform budgeting system. After the budgets have been finally acted on, the departments will know exactly what they may spend next year. Each line of activity will operate under its own apportionment, as the funds are not transferable from one department to another.

Upon submission of the budget estimate, and at least twenty days before the adoption of the appropriation resolution, the budget estimate shall be filed in the office of the clerk of the board, where it shall remain for public inspection. The law further requires that a copy of the budget estimate be furnished to each newspaper published in the county.

The county officials must also cause to be published in at least one newspaper published in the county, a summary of the budget estimate, showing at least the total appropriation recommended for each separate fund or function.

The responsibility for the carrying out of the budget system of handling county funds falls to the lot of the county accountant. No purchase is legal until countersigned by the accountant, who is personally responsible for the purchase orders he approves, and personally liable for orders approved without sufficient funds to take care of them.

The new system is designed to promote efficiency in the conduct of county affairs by setting up a definite amount of funds for each activity and by introducing a uniform system for all transactions, and by requiring each county to live within its income.
