

## **“Don't Give Up the Ship”**

Regardless of the action of the Commissioners of Macon county last Monday, there is still hope for the farmers. For the past several weeks The Press has been working quietly though strenuously in the interest of the farmers and we believe that our efforts will be crowned with success.

We hope to have good news next week for the farmers of Macon county, though we can give no definite assurance to this effect.

Therefore, it is suggested that forward-looking men all over the county stand by ready to place their shoulders to the wheel in the interest of agriculture.
