| MACON'S HIGH SCHOOL <br> SCHOLARSHIP STANDS <br> NEXT TO TOP IN STATE <br> (Continued from page one) <br> county which is as much as ten points <br> below the, state median. <br> Macon's students are twenty points above those of one of our adjoining counties, twenty-two points above another and sixteen points above another. The closest of our next door neighbors is five points below us. <br> Macon's Cost Figures Lowest <br> The standing of the students of Macon county is particularly outstanding and refleets a particularly high degree of efficiency on the part of the teachers when it is recalled that the cost figures for each pupil in the high schools of Macon county are the lowest in the state. If the matter of the amount of money spent per student in attaining to relative levels of scholarship were to be considered it is practically certain that being considered the present-standing of our high schools is an outstanding achievement. <br> The examination was given to 39 seniors at Franklin and to 8 at Highlands and the rating of the two schools shows that the 8 students at Highlands had a median attainment of 80.0 which is exactly 9.9 points over the state level that the 39 seniors at Franklin had a median of 84.6 which is 14.5 points above the state median. <br> While the records for the Highlands school are not available compaartive records for the past four years and while the state has never before published comparative records for counties it is possible to make a comparison of the Franklin standard of scholarship with that of all the seniors in the standard schools of the state for each of the past four years. <br> 14 Points Above State Median <br> Four years ago it is found that the seniors here were below the state level of attainment by a matter of nearly five points. Progress has been made each year in the raising the comparative scholarship of the students in the Franklin school until the last year shows them to be over | North Carolina News Digest <br> News Edited For the Man Who <br> Reads As He Runs <br> Two stories fell under our glasses today: One from Marion, in McDowell county, and one from somewhere else. <br> The one from somewhere else told about a young wife and her suspicious husband having some words which resulted in both their deaths; he killed her and then himself. <br> The one from Marion was different. The fellow in Marion also had a wife, but instead of using her as a sparring partner or for target practice she was associated with him in the practice of law and assisting him in a murder case. <br> Instead of fighting a duel they were playing a duett. <br> Here is what the story says: McDowell county's -second woman attorney, Mrs. D. F. Giles, was sworn in to practice law this morning and a little later took up her first case: helping her husband defend Jason Rhodes, negro, who is being tried on a charge of first degree murder of Sam Gardner, negro, here last year. <br> Her husband, local attorney, administered the oath to her. J. W. Winborne welcomed her in the name of the McDowell Bar association, saying that she and Daphne Spratt, Marion's other woman lawyer, who was sworn in to the bar several months ago should receive the credit that is due them and the attention of the public. <br> Mrs. Giles read law in her husband's office. She passed the bar examination several weeks ago. <br> The general belief among our fathers was that the Indian was mighty hard to kill.
