### SCIENCE OF MILK PRODUCTION TO BE SHOWN PRODUCERS

The Science of Milk Production, a sensational new movie, will be shown at the court house in Sylva Friday night, March 21 at 7:45 o'clock under the joint sponsorship of the County Farm Agents and County Health Department. Dairymen, farmers and others interested in milk production are invited to see the picture.

You will witness a remarkable milk-making demonstration, the like of which has never been shown before. The production of the picture is the work of Dr. W. S. Peterson, professor of Dairy Husbandry at the University of Minnesota, and one of America's foremost physiologists of the dairy cow. The picture is a full color, talking movie which takes you into the University Laboratory and Dairy Unit—yet, even inside the cow herself. You will see and hear Dr. Peterson as he points out the crucial steps in milk production from raw materials to finished product. He will also present his four famous rules on how to get more milk-capacity output from each cow—as developed from conclusive research and tests in the laboratory and on the farm.

The picture is receiving much praise from the dairymen and farmers of all sections of the state. Although it is being shown free it contains much valuable information and should be seen by all milk producers and handlers in the county.
