

CATAMOUNT BALL CLUB LEAVES WCTC ON ROAD TRIP

The Catamount ball club will leave Cullowhee today for a week's road trip, playing four conference games. The club will play High Point College at High Point Friday and Saturday, coming back West to Salisbury for two games with Catawba college on Monday and Tuesday.

When the club returns to Western Carolina they will play the first home game with North Georgia on April 19 at 3:30 p. m. on the newly constructed baseball field. Bleachers have been erected and reserve section for colored people provided.

The Catamounts are now completely equipped with new uniforms. Coach Tom Young feels that the team will get into shape on the road trip and by the time they return to the home field they will be a creditable baseball club, ready to give local fans some real ball playing. The bad weather of the past few weeks has hampered practice drills to some extent. But the club will overcome this as they warm up on this road trip.

Coach Jim Gudger, who has been helping with the baseball squad, will not make the trip as he has reported to Rocky Mount Baseball club of the Coastal Plain league.

Players making the trip to the Piedmont section are: J. B. Beam, 1st baseman; Marshall Teague 2nd baseman; Ray Lee and Ovie Heavner, 3rd-basemen; Clayton Everhardt, Pete McDonald, Peter Price, Tom Fore, outfielders; Joe Hunt and Bill Powell, catchers; Gene Grogran, Warren Dyermond, Jim English, L. C. Crocker, and Howard Barnwell, pitchers.

Small pocket schedule cards have been printed and placed at Velt's Cafe, Hedden's barber shop, Tuckaseegee barber shop in Sylva and Ed Battles store and Buck's Soda shop in Cullowhee for the convenience of those who would

HENRY FORD DIES AT AGE 83, BUILT MOTOR EMPIRE

Henry Ford, 83, died unexpectedly at 11:40 p. m. Monday at his unpretentious home in Dearborn, Michigan. The aged motor empire builder was stricken with a cerebral hemorrhage and died suddenly. His wife and household staff were with him at the time of his passing.

Ford, the son of humble Irish immigrants, became the World's wealthiest man. He left an industrial empire and an estate worth perhaps \$1,000,000,000.

Ford had spent Monday noon in the vast River Rouge auto plant and at Greenfield Village, a museum show place and principal hobby of the aged man in his declining years, to survey the extent of the flood damage, caused by torrential rains which had also disabled the lighting plant of his home and put the heating plant out of commission.

Funeral services will be held today from St. Paul's Episcopal cathedral in Detroit.

Control of the vast motor empire fell on the shoulders of the 20-year old grand son, Henry J. Ford had been in declining health for the past year and had quit making public appearances.

Sunday School Convention To Be Held Sunday

The Tuckaseegee Baptist Sunday School convention will meet Sunday afternoon, April 13, at 2:30 with the Buff Creek Baptist church at Addie.

Each Sunday school in the association is expected to have a good representation from its church.

Rev. J. V. Underwood will be the guest speaker.

In North Carolina, the period from 1880-1900 was the era of large scale logging which consumed most of the virgin longleaf pine stands.

like to have the complete schedule.

All games will start at approximately 3:30 p. m. Admission 25 and 50 cents.

THE KING OF SWAY Babe Ruth, recuperating from a serious operation, says goodbye to Danny Grieve (left) and Shelley Davis, after they had visited his New York apartment. Ruth told the boys that he'll accept the invitation to attend "Babe Ruth Day" ceremonies set by Baseball Commissioner "Happy" Chandler for April 27. (International)

Spring prints are perennial favorites along with new hats and daffodils, but unlike the pretty flowers they just don't bloom again and again and after one or two seasons at most they usually hang idly in the closet. But you can now put a stop to that. Prints can be dyed to change their color yet not disturb the pattern at all.

Last year's black and white print will make a hit with the crowd all over again if you dip it in a yellow dye bath. Or if your well worn number is brown and white, change its identity with lime dye to make it fashion-wise this season. In both cases the black and brown background will remain unchanged while the light figures will take the dye.

Pastel prints of two or more light colors can also be dyed to form new colors. For instance, a delicate blue and white can be converted into a lovely lilac and pink combination with pink and purple dye. A pink, dark green and white print dyed yellow changes to coral.

dark green and yellow. With a bit of imagination on your part you can take it from here to develop many fascinating combinations.

There are a few tips that are helpful to know about print dyeing. Just as you would any other material, test a scrap of the print in color you have chosen before adding the whole garment to the dye bath, then you will have a preview of what the new color will be.

To determine whether or not the colors in the print will run, test the material for 10 minutes at the same temperature used when the whole article is dyed. If the print shows a tendency to run it is still possible to do a quick tint job in hot tap water.

Since prints generally contain synthetic or manmade fibers such as spun rayon, make sure that you get all-purpose dye that is guaranteed to work on all fabrics. And remember that if a dress washes safely it can usually be successfully dyed.

Noted Editor Will Speak At Cullowhee April 21 On "Salvation By Science"

Dr. Gerald Wendt, Editorial Director of Science Illustrated and former science editor of Time, Life, and Fortune, will address students and faculty members of Western Carolina Teachers college in Hoey auditorium Monday, April 21. His subject will be "Salvation by Science," in which he will give his answer to the great problems that science has raised in education, economics, philosophy and religion.

Dr. Wendt is said to be America's best-informed and foremost interpreter of science to the pub-

lic. He was chosen Director of Science and Education at the recent New York World's Fair.

Dr. Wendt thinks of himself as a "foreign correspondent," a native of the "world of science," which he calls "the birthplace of the future." He has devoted his life to reporting and interpreting news from the "world" to the people of America in simple, understandable American. "American life will change more," he says, "in the coming ten years than in all the past 50 years."

Dr. Wendt has played an important role in nearly all phases of sciences, and has written two outstanding books on the subject, "Science for the World of Tomorrow" and "The Sciences." He has been a research professor at the University of Chicago, Dean of Pennsylvania State College, the first director of the Battelle Institute for Industrial Research at Columbus, Ohio, director of research for several important industries, president of his own company in New York, and a scientist in the government service.

Dr. Wendt is remarkably well-informed and up-to-date on scientific discoveries and their applications in the affairs of men. A steady stream of news dispatches, press releases, and trade journals, covering all of American industry finds its way to his desk. A book edited by Dr. Wendt, "The Atomic Age Opens," appeared in 1945, four days after the first bomb hit Hiroshima.

Dr. Wendt admits no hobbies except "science—and people." Even when on a lecture tour, he says, he is more interested in learning of new developments and "getting the feel of their reality" than he is in talking about what he knows. Before the war he made his lecture tours alone, driving in an open car, and he claims to have visited every state in the Union, and almost every county and almost every important city.

Dr. Wendt is known for the contrast of his sound knowledge and

Army Officer School Opens At Fort Riley

RALEIGH, April 7—Army Officer Candidate School has been opened to enlisted personnel of the organized reserve corps it has been announced by Col. Norman McNeill, Senior Instructor of ORC in North Carolina.

Each selected candidate, according to Col. McNeill, will attend an army officer candidate school of six months duration at Fort Riley, Kansas. Upon graduation from this school, Col. McNeill said, each individual will be commissioned a second lieutenant, Army of the United States, and assigned to a basic arm or service for which the individual will be selected upon graduation.

Members of the Enlisted Reserve Corps will not be required to serve on active duty with the regular army upon completion of the school, but may apply if he desires.

A prerequisite for attendance will be an agreement to serve actively in a commissioned capacity with the Organized Reserve Corps for 3 years.

Forms for making application may be secured by writing the Senior Instructor, North Carolina Military District, Raleigh, N. C.

Tompkins Returns Home

Dan Tompkins, Jackson county's representative in the General Assembly, returned to his home here Saturday night, following the adjournment of the law making body on Saturday.

dignified bearing with his informal manner, his simple, human speech, and his sense of humor. His favorite closing sentence is "The best is yet to come."

Dr. Wendt was born in Davenport, Iowa, and received his professional degrees at Harvard. He completed his training in pre-war France and has traveled extensively in Europe in attendance at international scientific conferences.
