How to Operate the New Parking Meters

LARGE ALL RED TURNING DIAL IN FRONT, AND FACING THE FLOW OF TRAFFIC, SHOWS AT A GLANCE TIME REMAINING TO PARK.

TURN HANDLE IN DIRECTION OF ARROWS
SLUGS WILL SHOW HERE
READ INSTRUCTIONS HERE.

INSERT COIN UP WATER DRAIN COIN SLOT. INSERT ONE COIN, THEN TURN HANDLE

YOU START TO WIND TIME ABOUT HERE, AND YOU FEEL A SLIGHT PULL ON THE HANDLE, KEEP ON TURNING.

Enforcement of parking regulations as provided by installation of parking meters has now commenced.

Parking meter regulations must be observed in accordance with instructions found plainly inscribed across the meter.

The important thing for the automobile owner to remember is that he must manipulate the meter himself, by turning the handle, to set the timing device in operation. Under no circumstances will police officers be authorized to manipulate the meter, except for the purpose of possible instruction when enforcement is first started.

In parallel curb parking, the operator must park so that the front wheel is adjacent to the meter.

Parking meters have been found in most cities to provide ample parking spaces by eliminating the tendency to double park. Double parking will not be tolerated.

To avoid a violation, the operator must set the meter in operation as directed on the face of the meter. This meter is exceptionally easy to understand and use, so failure to operate as shown will be inexcusable.

It shall be unlawful for any person to deface, tamper with, damage, open or willfully break, destroy, or impair the usefulness of any parking meter installed on the streets. This provision will be enforced rigidly, and parents will be responsible for any damage done by their minor children.

Meters have been installed for the benefit of the whole community, to better traffic conditions. The cooperation of the entire public is requested.
