COMPARE FORD with cars costing \$1,000 more!

THE BIG new Ford has an important feature you'll find in America's highest-priced cars... its powerful 8 is a V-type engine. And that's only the beginning! Relax in Ford's large, roomy interior and you'll be sitting on the same kind of soft, two-tone-tailored upholstery used in costliest cars. Or examine that "baked-on" enamel finish and you'll find it beats even custom limousines for keeping its "showroom complexion."

YOUR PICK OF POWER Another Ford feature unique in the low-priced class is its power choice—the famous V-8 engine and sensational SIX. Both engines give you balanced carburetion and 4-ring aluminum pistons for real economy. "KING-SIZE" BRAKES Yes, Ford has this feature of the costly cars, too! Just touch those oversize brakes and feel the smooth easy stop of self-centering hydraulics. You're mighty safe! "LIFEGUARD" BODY Ford's "Lifeguard" body is a "costly car" feature! The smooth, flowing lines of Ford's longer, lower look cover unit-welded heavy gauge steel which gives you safer protection. Place your order now for the world's greatest auto buy!

There's a Ford in your future!
