Winter Cover Crop Seed Available To **Jackson Farmers**

D. C. Higdon, Chairman of Jackson County A. C. A., urges that all farmers who have not. seeded a winter cover crop on all their land do so within the next three weeks.

The AAA office can now furnish Austrian Winter Peas for seeding cover crop and now is the most advantageous time to seed this crop. The amount recommended per acre is 50 pounds. Ryegrass can also be secured to seed winter cover crop is around 30 pounds per acre.

Ryegrass is also available for seeding for winter grazing. Around 40 pounds per acre is recommended for this use. It is most important that all acreage possible be seeded for winter grazing on account of the shortage of this year's corn crop; also due to the extremely high cost of feed. Ladino clover and Orchard grass seed are available for seeding permanent pasture. These seed are available to all farmers regardless of any amount of previous material. Any farmer interested in seeding any of the above mentioned crop should come to AAA office at once and get a purchase order for the seed.
