# UDFLA New 1948 Dedge Truck In Our Showroom

#### A COMPLETELY NEW LINE OF DODGE "JOB-RATED" TRUCKS **COMPRISING 248 BASIC CHASSIS MODELS RANGING FROM** 4,250 TO 23,000 POUNDS GROSS VEHICLE WEIGHT AND UP TO **40,000 POUNDS GROSS TRAIN WEIGHT**

A combination of massive strength and smoothly flowing lines is the keynote of styling for the new trucks. They were designed to combine appearance with comfort, safety, performance, economy and ease of handling.

Standard, de luxe and custom cabs provide more room, more visibility, more safety, and more comfort for the driver.

Seat width has been increased to 571/4 inches to permit three large men to ride without crowding. The chair-height seats provide leg support under the knees and can be adjusted seven inches. The natural back support also is adjustable for maximum comfort.

The seat cushion utilizes air in combination with coil springs to provide comfort. A hand control allows the drives to adjust cushion buoyancy to his weight or road conditions.

Dodge has seven different engines to handle the power requirements of its new line. Numerous engine improvements have been made.

Braking systems are larger and improved. Front and rear axles have increased load-carrying capacity. Front springs are longer. Radiator cores have been redesigned to facilitate better cooling. Exceptional improvements have been made in frame construction.
