

STATE COLLEGE HINTS TO FARM HOMEMAKER

BY RUTH CURRENT
State Home Demonstration Agent

There are right and wrong ways of doing even such a simple household job as putting clothes through the wringer of the washing machine, says home economists. Careless wringing can damage both clothes and machine.

Rules for Wringing: fold clothes smoothly so that the thickness is evenly distributed across the roll. Don't run cloths through in a lump - it is hard on both clothes and wringer.

Let the machine wring at its own pace. Never try to rush the job by pulling or forcing pieces through.

Large buttons or buckles should not go through the wringer. They are likely to break, bend, tear off or damage the rubber rolls. Fold small buttons or other fastings under a layer of the fabric before wringing so that they do not come in direct contact with the rolls. Otherwise, they may scrape the rubber or be ironed off. Belts, sashes or other small strips of clothing also should be folded under so that they do not catch in the rolls.

Sometimes small articles like handkerchiefs stick to one roll and are turned over and over. To avoid this, fold them inside a towel or large piece before wringing.

As soon as the laundry is finished, release the pressure on the wringer so that the rolls separate. If they are left pressed together, flat places form on the rolls which make for incomplete wringing. Wipe rolls dry before leaving the machine, or wash and dry them if they are stained by colored

Some of the 75,000 ABC Pins Get Ready to Travel

Did you know that rules of the American Bowling Congress call for daily replacement of the bowling pins same circumstances. In the photograph above a girl is repacking a few of the discarded pins for distribution by pins are used in the course of the event. The practice Chevrolet truck to privately owned bowling establishments.

Singing Convention to Be At Dillsboro

The Savannah district singing convention will hold its regular 4th Sunday singing at the Jarrett Memorial Baptist church at Dillsboro on Sunday afternoon, April 25, at 2:00. All singers and the public are invited.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION:—What varieties of cowpeas are suitable for combining?

ANSWER:—Last year at the McCullers Experiment Station, Brabham, Groat, Whipperwill, and Iron varieties were planted on July 15 and matured erect in good condition for combining. Black-eye and Crowder were not tested in this manner. It is suggested you plant a small plot of each variety you wish to use on your farm and observe their growth for combining, but do not plant before July 10. The Groat is the only variety observed growing commercially for combining in North Carolina, and their observation was in the upper Piedmont section.

QUESTION:—How can left-over paint be prevented from drying out and becoming unusable?

ANSWER:—Specialists recommend that broken cans of paint be protected from drying out by coating the surface with melted paraffin.

QUESTION:—How can fence posts be made to last longer.

ANSWER:—By soaking in pentachlorophenol, which is sold under various trade names. While

clothes. Improvised light for closets:—The provision of flashlight hung just inside the door in an unlighted clothes closet will discourage the use of matches when hunting for a lost glove, overshoe, or cap.

GAY NEWS

Well, Spring is here with all its flowers. It seems as tho everyone is busy, rushed to a "frazzle", but we always find time for a short rest when the Herald comes in.

Mr. and Mrs. Reisel Cabe and son of Sylva visited friends and relatives Sunday.

Mr. and Mrs. Walter Wilson were the guests of Mr. and Mrs. Eldon

tests with many kinds of wood are still under way, it has been shown that some varieties of wood heretofore considered worthless as posts can be made to last several years. Generally speaking, the life of posts can be greatly lengthened. However, not all kinds of wood are equally responsive to the treatment. Air-dried, round posts can be most effectively treated.

QUESTION:—Are soybeans subject to disease?

ANSWER:—Soybeans are subject to attack by a number of diseases, but only two cause heavy economic loss. They are stem rot and bud blight, the first of which is more serious. Studies indicate that stem rot may be prevented by a four-year rotation, that is, planting soy beans in the same field only one year in four.

Watson Sunday.

Mr. and Mrs. L. Woodard were the guests of Mr. and Mrs. Jud Cope Sunday.

Mr. and Mrs. J. O. Margon have announced the birth of a daughter April 5 in the Sylva hospital. Mrs. Margon before her marriage was Miss Virginia Collins.

Mr. and Mrs. John Johnson have announced the birth of a daughter April 6 in the Sylva hospital.

Mrs. Johnny Bishop spent Sunday with her grandparents, Mr. and Mrs. Ingle Cope.

Rev. Joe Bishop was the dinner guest of Mr. and Mrs. J. C. Browning Sunday.

Mrs. A. C. Wilson and Mrs. Bishop were the guests of Mr. and Mrs. Leo Wilson of Webster Sunday.

Miss Lorina Bishop, who is working at the Mission hospital, spent the week-end with her parents, Mr. and Mrs. Dove Bishop.

Mr. and Mrs. Alfred McHanan of Arlington, Washington, formerly of Gay, thinks the letter "L" is lucky for his family. He has seven children whose names start with this letter: Lester, Lewis, Lucy, Lendin, Leonia, Luellon, and Lucille. Lester served two years in World War II. Lewis is still in the occupation zone.

AN auto-wise Detroit editor writes, "Hudson... will still be in a sellers' market after the buyers' market returns!" A Cleveland motor-car writer, "The public is in for a thrill!" From a San Francisco auto editor's column, "Hudson has really hit the jackpot!"

And so it goes—right around the nation! Men who have "seen everything" in automobiles go for the New Hudson.

It is the only American-built motor car you step down into when entering, not up on! This new development brings you sensational advantages—among them, newly streamlined beauty that would otherwise be impractical.

This new kind of motor car is only five feet from ground to top, yet by stepping down, you get more head room and roomier seats than in any other mass-produced car built today—and there's good road clearance, too!

Because you step down, Hudson's new, all steel Monobilt body-and-frame* completely

encircles you, even outside the rear wheels, with a rugged, box-steel foundation frame—and this brings you a new measure of added safety.

You ride within this frame—cradled between axles—not on top of a frame as in the past. Hudson's new, lower center of gravity and rugged basic structure give this car delightful roadability—a hug-the-road way of going, especially on curves, that is so safe, so serene, so smooth, it is unlike anything you've known before!

See the new motor car the experts cheer. The nearest Hudson dealer will show it to you now! Hudson Motor Car Company, Detroit 14. *Trade-mark and patent pending
