LANDINGS -- THEN AND LATER

The Navy's role in the assaults of American forces on the shores and beaches of enemy territory has been indispensable throughout its history, although the invasion methods have changed radically with each conflict. Above photo of an old print depicts the landing of American forces under General Scott at Vera Cruz in 1847—amphibious operation, Mexican War style. Below is a scene from World War II, taken nearly a century later, as Marines stormed the black beach of Iwo Jima beneath scowling Mt. Suribachi in the landing craft of a scientific age. (Official Navy Photograph)

JACKSON FARM BRIEFS
 By J. C. McDarris

Farmers are in better heart. The Spring showers have certainly made a change for the better in their expressions. Crops have made a quicker come back than any one expected. Corn growing well; stand poor in sections. Irish potatoes saved in nick of time. Cabbage crop half set in Glenville; looking good. Beans planted to be less than last year's. Seed high; good price predicted. Use continuous planting method in garden. Sow emergency hay crops now. Feed supply to be short. The people who have used lime and phosphate on their pastures have seen them grow over night after the rain. The Levi Mathis of Wilmot will testify that good pasture can be built from poor land. They have cooperated with the AAA program and know that good farming is successful farming. The AAA program has advanced American agriculture by at least 25 years. Keep it with us by using its services.

W. T. Brown finds the 2 (4D) weed killer a useful agent in the garden. He states it will kill white clover and other pests in the strawberry patch to leave them unmolested. CAUTION—Follow directions very closely. Dr. Slagle's efficient nurse, Mrs. Padgett, accepts Mrs. Joe Deitz's challenge about having the largest capon for Christmas.

The Jackson County court house recently had some more paint applied. Do you know of any court house and grounds better kept? The view from the court house will revive the lowest spirit.

Oscar Lovedahl, Cowarts, is proving that purebred livestock

production on a medium sized farm is profitable.

Accompanied the Sylva and Cullowhee Veteran classes to the State Test Farm at Waynesville on Thursday. If you have not visited the farm, do so. You are helping to pay for it. Experiments can be seen which would mean more dollars in the farmers pocket. Where Spring seeded oats had failed to grow during the dry weather, the winter seeded varieties of Stanton and Letoria were waist high, laden with grain. Howard Clapp is in charge of the Test Farm. He sent a special invitation to Jackson

County.

For a near perfect farm set-up the Henderson Farm on Pine Creek is hard to beat. It is a live-at-home farm built not by money alone but through hard work, soil improvement, livestock, family co-operation and good management. If you do not believe farming can be a paying proposition or a beautiful place to live, I refer you to Mr. and Mrs. Gene Henderson.

Most of us know more than we use, have more to do with than we make use of.

"I had no shoes and cried, till I met a man who had no feet."

Outstanding!

You Name it...
 the 'Jeep' does it
THE UNIVERSAL 'Jeep' DOES MORE FOR THE FARMER THAN ANY OTHER VEHICLE

With 4-wheel drive for traction and steady pulling power in the field, the "Jeep" has a drawbar pull of 10,000 lbs., operates almost any standard tilling or harvesting implement. Rear power-take-off runs power-driven implements from standard spline shaft drive.

The "Jeep" can be used with the latest development in modern farming—a new hydraulic lift that raises, lowers or adjusts depth of implement while the operator remains comfortably seated. And of course handles conventional pull-type implements, too.

The Universal "Jeep" is for hauling and towing on or off the road in all kinds of weather. It carries up to 1200 pounds, pulls a braked load of 2½ tons at highway speeds.

It provides mobile power anywhere on the farm, for operating many types of power-driven equipment such as separators, feed grinders, buzz saws, hammer mills, ensilage cutters and numerous others.

This message gives but a glimpse of the all-around, year-round usefulness of the Universal "Jeep". We invite you to see this versatile vehicle in action and let us prove that it does more different jobs than any other single farm vehicle. Call for a demonstration now—on your farm, with your equipment.
