INSIDE WASHINGTON

WASHINGTON — The adjournment of the special session of Congress has set the stage for the presidential campaigns ahead, with President Truman likely to journey to the Pacific coast within the next eight weeks.

GOP presidential candidate Thomas E. Dewey is regarded as almost certain to go west before Mr. Truman in the presidential sweepstakes, with GOP vice presidential candidate Earl Warren probably coming east.

On the Democratic side of the picture, Senator Alben Barkley of Kentucky, Mr. Truman's running mate, is slated to concentrate on border states where Senate seats hang in the balance.

In fact, one of the considerations behind Barkley's vice presidential nomination was the help he can be counted on to give the Democratic party in its fight to re-win control of the Senate.

Mr. Truman is virtually certain to pitch his main campaign battle on the record of the 80th Congress, particularly its failure to carry out his anti-inflation program. However, both Dewey and Warren are expected to counter by naming Mr. Truman for the still soaring cost of living.

"FLYING RUNWAY" MAKES BOW — The Air force is now receiving a "flying runway" cargo plane which could have shortened the Pacific war had it been available.

The "flying runway" is the famed Fairchild packet equipped with tractor-type landing gear. It can land and take off in any reasonably level area.

Perfection of the tractor or track-type gear will eliminate in any future war much of the laborious airfield construction heretofore necessary before volume "air lift" of supplies could begin to supply beachhead forces.

The idea of the track-type landing gear for airplanes was first tinkered with in 1920, but World War II had to be fought and won before its worth was appreciated and concrete action taken.

Now 18 of the "flying runway" planes have been put in operation and 25 more will be built.

One of the moving spirits in pushing the experiment was Gen. George C. Kenney, head of the Strategic Air Command. Kenney, as Gen. Douglas MacArthur's air chief in the Pacific, remembers countless crises when he could have moved up on Japanese islands much sooner had he had the "flying runway."

JUDGES' BOX SCOKE—The score sheet for the recently ended term of the Supreme Court shows that fiery Justice Felix Frankfurter most often rebelled against the majority's decisions. He wrote 18 of the 70 dissenting opinions issued during the term.

Justice Robert H. Jackson trailed Frankfurter with 13 dissents, and Justice Wiley Rutledge was third with 10.

Justice William O. Douglas did the most work on majority opinions, which are the weighty documents announcing the court's decisions. He wrote 22 of the 110 handed down.

Next in line were Justice Hugo L. Black with 18 and Justice Jackson with 17. Chief Justice Fred M. Vinson, boss of the high court, was a poor fourth with 12 opinions.

The missionary is to work with the pastors in selecting and training officers in the Sunday School, Training Union, Woman's Missionary Union and promote simultaneous and co-operative efforts such as schools of missions, enlargement campaigns for Training Union and

Cashiers Home Dem. Club Observes Annual Picnic

The Cashiers Home Demonstration club held its annual picnic at Elyea's Spring on Tuesday, August 24.

Following a brief business meeting at the opening of the meeting over which Miss Mary Johnston, presided and gave some information as to how the curb market in Sylva is carried on and how it is operated financially, the club voted to send in a donation toward expense of equipping the market.

The picnic lunch was served on a big out-door table, and the crackling fire in the little furnace made everything very cheerful. There was an abundance of food and every one had a grand time eating and visiting with each other. (Some complained of being mighty full.)

Thirty-four members were present for the delightful occasion.

Kidneys Must Work Well-

For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

Shall We Spray?

With eight cases of polio having developed in Jackson county since the polio "season" began back in the early summer, and with the last four cases being in and near town, it appears now that the wise thing to do is to have the buildings and premises of the property owners of Sylva sprayed with a solution of DDT, such as has been used in other cities and communities. This cost of doing this job, according to Mayor Allison, will be around \$525.00, a small sum compared to the cost of treating just one child who might become ill with the disease, to say nothing of the tragedy of having one or more of the children in a family suffering, probably permanently injured from the disease.

We feel that the town and county, or some one or two civic organizations should head-up a working organization toward raising the necessary funds to pay for having the spray applied.

We have to but look at our neighbor county, Haywood, just to the east of us, and next door to Buncombe county, where so many cases have developed. Haywood has been free of the disease so far, Waynesville and Hazelwood had this spray applied several weeks ago. No one can be sure that spraying is the reason Haywood county has had no polio, but it stands to reason that it has had something to do with it.

Let's spray in Jackson county before any more cases develop!

We Salute Labor

We salute the laboring men of Jackson County as they pause on Monday in observance of their annual "Labor Day" holiday, which is also observed nationwide. In speaking of the laboring man, we include all men, and women too, in Jackson county since most of us make our living, and add to the good of the community as a whole, through our combined labors—whatever line of work we are engaged in.

The laboring man is usually thought of as the man who has a hard task, with long hours. But this is not the case any more. Labor, through its organization, and industry through its benevolent attitude toward the men and women employed, have placed the wage earner on a standard whereby his job is the most satisfactory of any kind of employment in this day of inflation and high living costs.

Jackson County labor is just as fine as found anywhere, working and cooperat-

TIMBER TALKS

By W. C. HENNESSEE

TIMBER TALKSCH

To get the most money for your forest products, sell your time with your timber. This means, of course, do your own logging and sell the products as logs or bolts. Farmers are learning that hour for hour woods work brings higher wages than most farm work.

Here is the story of a man I know who recently cut and sold some logs. He had his own team and hired one hand to help him. When the job was half completed he began to wonder if all this hard work was paying off. He kept records on the remaining work and this is what he learned. On the basis of \$20 per thousand board feet, Doyle Scafe, his time in the woods netted him \$2.00 an hour. In addition to this his team was worth \$15 a day. He not only earned good wages but improved the condition of his woods. He cut the trees that were mature and slow growing and left the healthy young trees to produce future sawlogs. He is now a strong advocate of the landowner doing his own logging. He hasn't made enemies with the sawmill operator either, as logs are needed right now.

You may not be able to do woods work by yourself. But have you thought of trading labor with your neighbor?

Usually this arrangement turns out more profitable than straight hiring of labor. In this way hard work is made enjoyable. It builds up a community spirit. If labor is hard to get in your community this fall, try swapping labor with your neighbor.
