North Carolina Chamber of Commerce Executives

New Planing Mill And Dry Kiln Located At Addie

We have spent more than a quarter of a century working in the lumber and timber industry. We feel that during this time we have gained considerable knowledge of the lumber needs of the building trade and furniture industry throughout the country.

With the completion of our new plant at Addie, which consists of the latest type wood working machinery and one of Moore's Mod-

era Fan-Type Dry Kilns, we feel fully confident we can supply lumber for practically any and all purposes. Our several yards of Hardwood and Pine lumber assures us at all times of an adequate reserve.

Whether you intend to build a cottage or a village, whether your needs are for a small furniture shop or for a giant furniture factory, we feel you will do well to see us before placing your lumber orders.

W. C. Hennessee Lumber Co., Inc.
