## Lions Participate In White Cane Sale For Blind Funds

Members of the local Lions Club will actively participate this week in the annual state-wide White Cane sale and membership enrollment campaign of the North Carolina State Association for the Blind in its effort to raise \$25,000.00 to aid the blind and to prevent unnecessary blindness. One-third of the proceeds derived from the sale of White Cane buttons will be retained by the club for its local work for the blind, the remainder being sent to the State Association to aid blind in those areas of the state where there is no organized work on behalf of the blind. During the period from September 19 to September 24, the local Lions Club will join hands with the 187 other Lions Clubs of North Carolina to assist the Association in its annual drive for funds. These 8,500 Lions will raise funds to pay for eye examinations, operations, hospitalization and glasses for needy persons. Work among school children to prevent blindness will be expanded, and to those who are already blind, the Association plans a program involving vocational guidance, training, and placement in employment. Books, training supplies, and equipment will be purchased. Since 1934, the Association has been active in work for the blind, co-operating with Lions Clubs of the state to promote legislation on behalf of the blind, making available appliances in special types of employment for the blind, providing the blind with much needed recreation and working in every way possible to improve the general welfare of the

blind. Much support is being given the Association's enrollment campaign to secure memberships into the Association. The local club is seeking annual memberships into the Association for an annual fee of \$1.00 or more per membership. Also, an effort is being made to renew all old memberships. Within the club itself, memberships will be sought for an annual fee of \$1.00 or more per member.

White Cane buttons are on sale this week for contributions of ten cents and up. Lions and Lionesses as campaign workers will accompany their drive for funds with information on the work which is being done and will explain fully the symbols of the White Cane bearing a red tip. This cane is to signify that the person carrying the cane is blind, and it is warning to the motorists when approaching a person with such a cane.

This is the third annual campaign of the Association. The success of a few past campaigns have made it possible for the work for the blind of the state to be handled on a more extensive scale with more immediate and effective results.
