A petition was filed with the interstate commerce commission by the Odell Hardware Company, of Greens boro, and other North Carolina ship pers, against the Southern Railway and other lines operating in the Southeastern territory, which is the culmination of a protracted contest over rates to and from North Carolina points. The complaint alleges that the railroads discriminate against North Carolina cities in favor of what technically, is known as the "Virginia cities" territory, and that by this discrimination the manufacturers of North Carolina are deprived of the advantages of the location and natural resources. The commission is rerequested to readjust the North Car olina freight rate structure on a basis of equity and non-discrimination.
