Uric Acid Is Slow Poison

Excess uric acid left in the blood by weak kidneys, causes more diseases than any other poison.

Among its effects are backache, headache, disziness, irritability, nervousness, drowsiness, "blues," rheumatic attacks and urinary disorders. Later effects are dropsy, graval or heart disease. are dropsy, gravel or heart disease.

If you would avoid uric acid troubles, keep your kidneys healthy. To stimu-late and strengthen weak kidneys, use Doan's Kidney Pills—the best recom-mended special kidney remedy.

OF GEORGIA DEAD

ILL DUT TEN DAYS, DIES IN WASHINGTON HOSPITAL OF KIDNEY TROUBLE.

19 YEARS IN THE SENATE

Gallant Soldier, Brilliant Lawyer, Had Attained Nation-Wide Prominence.-Mark of Respect Paid Dead Statesman by the Senate.

Washington. — Augustus Octavius Bacon United States Senator from Georgia for nearly 19 years and chairman of the Foreign Relation Committee since the ascendancy of the Democratic party March 4, 1913, died in a hospital here after an illness of ten days. He was the first United States Senator elected by direct vote of the people under the seventeenth constitutional amendment.

Though Senator Bacon had been seriously ill with kidney trouble and complications developing from a broken rib, his death was unexpected. It came suddenly at 2 o'clock in the afternoon and news of the end fell upon the Senate as a shock while it was in executive session.

The 'mmediate cause of the Senator's death was diagnosed as a blood clot in the heart. Throughout the monrn'ng he had been in good spirits and it was announced to his colleagues that he was feeling better than for several days. Physicians had determ'ned that an operation which had been contemplated, was unnecessary Despite his 75 years it appeared that the affliction which he suffered was of recent origin, and specialists believed it would yield to treatment. This conclusion relieved considerably the anxiety of the friends and associates in Congress.

Half and hour before his death the Senator talked with his daughter, Mrs. W. B. Sparks of Georgia. She had just left the room when he raised himself in bed. As Mrs. Sparkes reentered the room her father fell back in collapse and never regained consciousness.

In the absence of Senator Hoke Smith of Georgia Senator Overman was notified and proceedings in the Senate were abruptly halted when the North Carolina Senator announced the death. A brief resolution of respect was adopted and the Senate adjourned.

The scene on the floor of the Senate was an unusual one. Not only had the death of their colleague shocked the Senators, but the effect of his loss at a time when important foreign relations measures were pending at once impressed itself upon the minds of Democratic and Republican leaders.

Informing the Senate of Senator Ba-

con's death, Senator Overman said: "In absence of the Senator from Georgia, Mr. Smith, it becomes my nainful duty to announce to the Senate the death of Senator Bacon. The sudden passing away of this great Senator, who came to this chamber with all the honors which has native state could confer upon him and who repaid that trust by his long, honorable and industrious career in this body, is an irreparable loss not only to the Senate, but to the people of his state, and also to the country at large."

Reserve Board Hears Hoke Smith.

Atlanta, Ga .- A section of the counry which is self-supporting two-thirds of the year is entitled to receive a sepate reserve district and a reserve bank under the provisions of the new currency bill, according to Senator Hoke Smith of Georgia. Senator Smith so interpreted the so-called self-sustaining provisions of the law in a statement before the organization committee of the federal currency reserve system here.

"I am very strongly convinced that under this bill the Southeastern section should receive a separate reserve district and have a reserve bank," the senator declared.

Preident Wilson Improved.

Washington. - President Wilson's cold was much improved. The president junched and dined with his family. It was the first time in three days that he had descended from the upper apartments of the White House. White House officials said they did not know whether or not the president would be at his desk in the executive offices next day. So far as known no engagements have been made for him and it is likely he will be given an additional day of rest before resuming work.

Plan to Prevent Floods. Washington. — Appointment of a committee of business men from the country at large to provide means for preventing floods will be urged upon President Wilson at a hearing February 26. Immediate action to further the flood prevention movement has been urged by Ernest P. Bicknell, national director of the American Red Cross, in a letter to Edmun T. Perkins, president of the National Drainage Congress, replying to notification that the lack of finances had haited the educational work of that congress.

FALLING HAIR MEANS DANDRUFF IS ACTIVE

Save Your Hair! Get a 25 Cent Dottle of Danderine Right Now-Also Stops Itching Scalp.

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff-that awful scurf.

There is nothing so destructive to the hair as dandruff. It robs the hair of its luster, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die-then the hair falls out fast. A little Danderine tonight-now-any time-will surely save your hair.

Get a 25 cent bottle of Knowlton's Danderine from any store, and after the first application your hair will take on that life, luster and luxuriance which is so beautiful. It will become wavy and fluffy and have the appearance of abundance; an incomparable gloss and softness, but what will please you most will be after just a few weeks' use, when you will actually see a lot of fine, downy hair-new hair-growing all over the scalp. SCHOOL TEACHERS. Also Have Things to Learn.

"For many years I had used coffee and refused to be convinced of its bad effect upon the human system," writes a veteran school teacher.

"Ten years ago I was obliged to give up my much-loved work in the public schools after years of continuous labor. I had developed a well defined case of chronic coffee poisoning.

"The troubles were constipation, flutterings of the heart, a thumping in the top of my head, and various parts of my body, twitching of my limbs, shaking of my head and, at times after exertion, a general "gone" feeling, with a toper's desire for very strong coffee. I was a nervous wreck for years.

"A short time ago friends came to visit us and they brought a package of Postum with them, and urged me to try it. I was prejudiced because some years back I had drunk a cup of weak, tasteless stuff called Postum which I did not like at all.

"This time, however, my friends made the Postum according to direc tions on the package, and it won me. Soon I found myself improving in a most decided fashion.

"The otlor of boiling coffee no longer tempts me. I am so greatly benefited by Postum that if I continue to improve as I am now, I'll begin to think I have found the Fountain of Perpetual Youth. This is no fancy letter but stubborn facts which I am glad to make known."

Name given by Postum Co., Battle Creek, Mich. Write for a copy of "The Road to Wellville."

Postum now comes in two forms: Regular Postum—must be well

Instant Postum-is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious bever-age instantly. Grocers sell both kinds. "There's a Reason" for Postum. CORN EXHIBIT FROM SOUTH

Southern Railway Makes Attractive Showing of South's Corn Record at Dallas.

Dallas, Texas.-An exhibit attracting much favorable comment among visitors to the National Corn Exposition, which was opened in this city February 10, is that made by the Southern Railway, Mobile and Ohio Railroad, Queen and Crescent Route, Georgia Southern and Florida Railway and Virginia and Southwestern Railway, showing what Southeastern farmers have accomplished in growing corn, and displaying agricultural products from all the nine states in the Southeast along the Southern Railway and allied lines. With a single exception, no other railways in the country are making exhibits at the exposition, and the Southern's exhibit is the only one from most of the Southeastern states, only three or four of which are represented through their state colleges.

The exhibit consists of corn grown along the lines of the various roads and to a great extent by farmers who raised their crops under supervision of Field Agents of the Railway Companies' Department of Farm Improvement Work. Grains, grasses, hay, cotton, vegetables and other agricultural products, and apples and other fruits, both fresh and in jars, all

grown in the South, are displayed. A folder containing information about the corn growing record of the South, issued by the Land and Industrial Department of Southern Railway Company, is being handed visitors to the Corn Exposition and is also being distributed throughout the country for the purpose of attracting desirable settlers to the Southeast.

May 20th Celebration.

Charlotte, N. C .- At a meeting of the directors of the Mecklenburg Declaration Society, it was unanimously decided to extend a cordial and pressing invitation to the entire State to attend the Celebration of the week of May Twentieth and to participate in some fitting manner in the Grand Parade to be held on the 20th of May

As the signers of the original Declaration of Independence of May 20th, 1775, were mainly farmers, it is eminnetly appropriate that they should today share largely in making this celebration an unequalled success. It is hoped that President Woodrow Wilson will find it possible to attend this celebration, and it is felt that it will be most proper for the farmers and others of this section to give concrete recognition of his efforts in their behalf by being conspicuous in honoring him on this occasion.

Prizes to encourage competition in getting up attractive features for the parade will be offered and other inducements will be provided. It is planned to make the parade this year one that has never been equalled since the first celebration, and further details regarding the parade, prizes, etc., will be announced later.

More Tick Free Territory.

Washington.-The territory in the South freed from cattle ticks and released from the quarantine has been by 17,106 square miles by an order issued by the acting secretary of agriculture, effective February 16, 1914, releasing additional portions of Virginia, North Carolina, Tennessee, Georgia, Alabama, Mississippi, Oklahoma, and Texas. This action has been taken as a result of further progress made in the extermination of the ticks which spread splenetic or Texas fever of cattle. The total area released since the beginning of the work in 1906 now aggregates 215,908 square miles, and amounts to about 30 per cent of the territory infected at the time the work was undertaken.

The portions of the several states released from quarantine under the order mentioned are as follows:

In Virginia: The county of Sussex and the balance of the county of Greenesville.

In North Carolina: The counties of Moore, Hoke, Scotland, Robeson, and

New Hanover In Georgia: The counties of Mor-

gan and Franklin.

In Tennessee: The remainder of Marion county.

In Mississippi: The counties of Clay, Jasper, Smith, Scott, and Leflore, the remainder of the counties of Lowndes, Holmes, Madison Attala, Rankin, Noxubee, Chickasaw, and portions of the counties of Claiborne, Warren, Yazoo, Sharkey, Bolivar, Newton, Grenada, Leake, Monroe.

About the Weather Bureau.

Washington.-Many people have an idea that there is something mysterious and occult about the work of the weather bureau in forecasting the coming of storms, frosts, and floods. Not a few think that the observers must necessarily get their data by reading the planets, the stars, and the moon. As a matter of fact, the forecaster of the bureau foretells the coming of disturbances in a businesslike way, very similar to that in which a man who has ordered a shipment of goods estimates the date of arrival.

A Good Fertilizer.

Washington.-In helping the manufacturers of soil fertilizers to increase their output, the United States department of agriculture believes that the interests of the farmer are enhanced. The use of fertilizers to supply nitrogen to the soil is of continually increasing importance to our agricultural ropulation. Fish refuse has proved an important source of organic nitrogen for fertilizing purposes, and the necessity of preparing it in com-mercial form has led to the develop-ment of the fish-scrap industry.
