UNDER YOUR NAME ON THE LABEL
the line tells you when your subscription expires. If the paper does not stop when your time is out a 1c postal card or letter addressed to MR. H. L. STORY, Marshall, N. C., will stop it. If he does not hear from you, he will think you wish the paper continued and that you are willing to pay for it at the rate of 50c every three months.

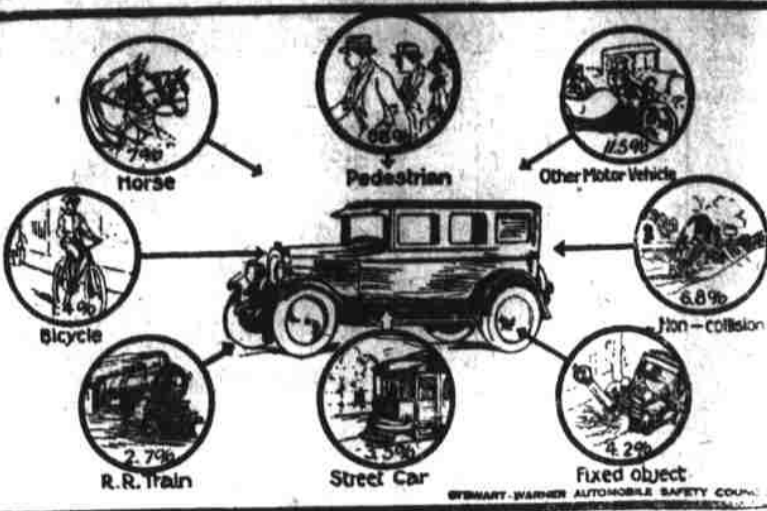

SIGN YOUR NAME
Don't blame the publisher of the News-Record for not publishing what you write, if you do not sign your name and address. We cannot publish articles unless we know who sends them. We will not publish the name if you object.

BIBLE THOUGHT
GOD RETURNS FULL MEASURE—"And the angel of Jehovah called unto Abraham a second time... and said, 'In blessing I will bless thee, and in thy seed shall all the nations of the earth be blessed; because thou hast obeyed my voice.'" Gen. 22:15-18.

SAVE WATER
The town authorities have given warning that the water supply for Marshall is diminishing. As long as the reservoirs overflow it does no good to economize, but when the supply is reduced so that the reservoirs are not full, every loyal citizen should observe strictly the warning and use only what is necessary for household use. It may be soon more serious than last year.

From Upper Big Pine
The people of this section are very busy these days putting up hay, and stacking wheat.
C. J. Wild started out Monday with his threshing machine.
Mr. A. L. Buckner recently purchased the Jim Roberts Farm, and is having Mr. Joe Worley to saw his timber.
Mr. Floyd Caldwell still makes his weekly visits to Mr. A. L. Buckner's.
When the roll was called at Mr. Elbert Buckner's Sunday for dinner Mr. Erastus Plemmons was still present.
Miss Tilda Correll, who has been seriously ill, is improving very fast.
Floyd Caldwell was seen hauling wheat Monday.
Mr. and Mrs. Dewey Buckner were visiting Mrs. Buckner's father, Mr. Joe Worley, Sunday of Worley, N. C.
Mr. Roy Baker and sister, Lois, passed the square Saturday afternoon en route to Mr. Julius Roberts' to spend the night.
Mr. Roy Buckner and Mr. Wayne Davis muled over to Mr. L. E. Baker's Saturday evening to get some lost cattle.
Mr. Zeb Davis still has weekly visitors from Little Pine.
Mr. and Mrs. Robert Cooper of W. Va. have been visiting friends and relatives on Big Pine.
Mr. Garfield Roberts is planning on going into the wood business again as he has purchased another mill.
Mr. Barnett Freay was visiting in Marshall one night last week.
Mr. Ross Leonard is still Big

Pedestrian Greatest Victim of Automobile Accidents

THE PEDESTRIAN is the greatest sufferer in automobile fatalities, according to records analyzed by the Stewart-Warner Safety Council for the prevention of automobile accidents. No complete record is available for the United States as a whole, but a report based on 3,023 auto fatalities occurring in the first seven months of 1923, covering a population of thirty-one million is significant. Two thousand of these 3,023 fatalities have been classified according to type. Sixty-eight per cent of the victims were pedestrians, 15 per cent occurred with another motor vehicle; 7 per cent with horse vehicles, 4.2 per cent with fixed objects such as lamp posts, 3.5 per cent with street cars, 2.7 with railroads and 1.4 per cent with bicycles. The remaining 6.8 per cent involved collisions. The small proportion involving railway trains is encouraging, doubtless due to the gradual abolition of unguarded grade crossings. menace to the pedestrian, however, is alarming, and calls for greater attention on his part in crossing streets and on the drivers for more careful driving.

Milk Can't Be Made On Tonic

Grass is a good tonic for the cow but she can't make milk on tonic, according to the Larrowe Institute of Animal Economics. If she is expected to continue to do a day's work every day, she will have to get enough to eat of a good nourishing feed.
"Few dairymen realize that in some respects a dairy cow is a great deal like a human being," states the Institute. "No human being would stop eating meat and potatoes simply because he was eating lettuce and spinach to tone up his system, yet many dairymen believe that their cows do not need grain simply because they have grass to graze on.
"Fresh spring grass is a good tonic for the cow. It is green, juicy and palatable. Cows like it. It tones them up and for a time will actually stimulate milk production. But grass at its best is half water, and a cow has to eat an enormous amount of pasture daily to get the feed she needs. Grass, therefore, should be used more as a tonic than as a feed. All dairymen should use pasture but they should use it intelligently and should use it with grain. The practice of turning out herds on pasture as soon as the grass comes up thick and green is always a costly move, both in damage to pasture, and to an even greater extent, in the falling off in production on the part of cows relying on grass alone for their nourishment."
Actual tests by E. A. Hanson, in charge of cow test association work in Minnesota, of the effects of pasture feeding as compared to the use of grain, especially throughout the spring and early summer, showed that 1,233 cows receiving no grain on pasture averaged 228 pounds of butterfat per year at a feed cost of \$41.87. In contrast to this, 572 cows receiving grain while on pasture averaged 296 pounds of butterfat per year, at a total feed cost of \$49.35. That extra \$7.48 spent for feed during the pasture season resulted in an additional 68 pounds of butterfat from each cow, which, on the basis of 40 cents a pound, was worth \$27.20, or a net profit of \$19.72 above the added cost of feed.

A FEW FILLERS

Let the work animals run out in the open pasture some of these warm nights, advise livestock workers at State College.

Fresh pastures will cause increased milk flow and a decrease in butterfat content. Keep this in mind when separating the milk and settling with the creamery.

Work in improving the cotton varieties in North Carolina was begun fifteen years ago and from the great hodge-podge of varieties tested a few have been found to be worth breeding and improving.

Don't plant tobacco on land affected with root knot. It is better to rotate some other crop not susceptible to the disease.

Forty-nine farmers of Alamance County sold 11,892 feet of walnut timber cooperatively for \$874.89. The largest log brought \$54.15.

Nine carloads of magnesium limestone were bought cooperatively by farmers of Granville County during the latter part of March.

North Carolina is on the verge of a great development in livestock production, thinks Prof. R. S. Curtis, of State College.

Weeds and grass use valuable moisture during dry summers. Frequent cultivation will keep them in check.

From PAINT ROCK

We are having some nice weather now. The people of this place are done laying by corn. We are in great need of rain in this community.
Mr. Henry Lamb and Willie, and Mr. J. W. Wyers are working on the Shutin road now.
