

DID YOU EVER STOP TO THINK?

By Edson R. Waite, Shawnee, Oklahoma.

Albert B. Adams, of Chattanooga, Tenn., Immediate Past President of the American Face Brick association, says: "Now that the American people are demanding—and getting—color in every possession, indoors and out prospective home owners are learning with some astonishment of the color possibilities in the use of that age-old building unit, the clay brick. From the moment when, thousands of years in the past, some ancient Edison observed the sun-baked and irregular cracked clay blocks along the Euphrates, the idea of building with units shaped of clay has been constantly in the mind of man. At the dawn of recorded history, some 4000 B. C., it is probable that the art of burning brick by fire had been developed. In the marvelous Hanging Gardens of Babylon, brick construction reached a height not soon to be surpassed although the use of brick spread through out the then civilized world. And during the Roman supremacy, on into the dark ages, and through medieval times, beautiful structures were fashioned of brick that even now serve as inspiration to present day builders.

Coming to modern times, our own country early accepted brick as a superior building material. But our resourceful manufacturers were not content with the product as it had gradually evolved, and within the past few decades developed a distinct and extensive industry that produces these everlasting blocks of clay in a veritable rainbow of enduring color.

These improved brick that are made specifically for beautifying men's homes and offices and cathedrals are known as face brick. Through the magic of the sweeping flames in the kiln, drab clays and shales take on the hardness of rock and exhibit a galaxy of hues and shades that would shame a Joseph's coat. Observation of modern brickwork reveals soft blendings not only of reds and buffs, but of practically everything from gun metal blacks through the browns, purples, blues and greens, to the grays and creams. No garish tones, but subdued, burned in color, in an amazing range of hue and texture, with as much or as little variation in any one building as desired.

Tried in a bed of flames, brick of course offer ample protection against the destroyer, Fire. And also against the less spectacular but ever attacking forces of wind and frost and rain, which bring to less hardy stuff a gradual dimming of beauty and eventual disintegration. But age is kindly to a face brick wall, occasioning only a becoming softening in tone.

From time immemorial, the hardest burned and best colored bricks have been selected for facing walls. But it remained for American ingenuity to develop methods of manufacture, and to discover deposits of clays that would furnish the great variety of beautiful colors and textures now available in face brick—a distinct contribution to the beauty of our age.

DIZZY Lost Appetite

Mr. M. F. Fink, of Harrisburg, N. C., says: "It must have been fully twenty-five years ago that I began taking Black-Draught regularly. I was in town one day, and while talking to a friend I stooped over to pick up something. When I straightened up, I felt dizzy. I spoke to him about this and how I had not felt like sitting. My friend told me to take some Black-Draught. I knew my mother had used it, and so I bought a package. When I got home, I took a good, big dose, and the next night, another. In a few days I felt much better. A good many times I have had this dizziness and a bad taste in my mouth, or headaches, and then I take Black-Draught and get better. I do not have to take it very often. We buy from five to seven packages a year." Try it!

WHY DO YOU STAND IN DARKNESS?

Dear sinners, why do you stand in darkness when life's crown is so bright and Jesus is calling you to step into the light and why not, Jesus gave his life upon the cross for everyone that will believe and trust him to the end. Then farewell, have a home forever where never a pain nor sorrow comes. Let us all be ready when the Lord shall come again, we know not when the Son of God is coming and we must watch and be ready when we see him coming in a cloud so bright. Dear sinners, I want you all to take warning and give your hearts to Jesus before it is too late. Miss Nola Freeman, Odessa, N. C.

A SHORT LETTER

Dear Editor:— Will you permit me space in your paper, to write a few lines in regard to a couple or more letters I read in the News-Record, one written by Mrs. Mary Jarvis, one by Mrs. Harry Hill, of Hot Springs, and one by Wesley Hunter, of Marshall. I heartily agree with Mrs. Jarvis in all that she said, but with Mrs. Hill and Mr. Hunter, I do not, I am as Mrs. Jarvis said, I am not a woman to dabble in politics, and never have voted before, until this year, I am going to vote. If I can cast one vote against Al Smith I sure will do so. The election, this year, is quite different to what it has ever been before. It is time that people will be tested as to whether they want Religion and Freedom or not. A vote for Smith is a vote for Romanism, War and Ruin. A vote for Hoover is a vote for Religion and Freedom. It is high time for people to wake up and get their eyes open and cast a vote for Hoover, especially all that do not want the Roman Catholics in power. Every person that votes for Al Smith is voting against his children, they are voting them to ruin and destruction. I would advise Wesley Hunter to read and study his Bible more, (if he has one) and see if Smith's religion is according to the Bible. Al Smith is not a Democrat, he is a Roman Catholic, and why people want to vote for him is a mystery to me. It made my blood run cold when I read what Gov. Smith says. In the last issue of the Record, every word he said is false, yes, more than false. Wake up folks, cast a vote for Hoover, let's beat Smith, so far that he will be ashamed to tell his name forever after. A READER.
