

FARM GRIT.

GRIT GRINDS.

Edited by
COUNTY AGENT

Let us grow clover and grass on the hill;
While intensely the levels and flats we till.
The cows and hens will settle our daily bill;
While the beeves, sheep and tobacco the coffers fill.
And, when orchard, garden and sty the larder fill,
Then, with a smile, will Mary greet her Bill.

HIS FARM PAYS.—Wm. S. Rice was in the office a week ago. He brought a hand of soy bean and cane hay that he had gathered from a field recently cut. It was a sight that would make a cow's mouth water. He reported at least 2 tons of this feed.

Mr. Rice also told of going to Erwin with a load of apples, 22 bushels in all. He told how, when he priced his Golden Delicious at \$2.50 per bushel, the other party literally grabbed them. This load of apples sold for \$44.

We were interested. We thought, to ourself, that here

was a mountain farmer who was evidently making a profit from his farm. We began to ask questions. We learned that this year Mr. Rice had grown around 140 bushels of apples that had sold for \$240. He had threshed 77 bushels of oats from a 3-acre field which he valued at around 70 cents per bushel. Aside from this he had cut and stored in the sheaf nearly a third of this 3-acre patch. We figure that his oat crop is worth to him nearly \$100. He has 4,000 sticks of tobacco curing that he believes will average a pound to the stick. Let's sell this for 25c (he may get it, he may not). This tobacco can be said to be worth \$1,000. Around 6 acres of corn that will average 40 bushels to the acre is growing on the place. He should value this at about \$1 per bushel making the crop worth \$240. Mr. Rice has about 2 tons of soybean and cane hay that should be valued at around \$40.

Let's figure up. Apples,

\$240; oats, \$160; tobacco, \$1,000; corn, \$240; soybean hay, \$40. This is a total of \$1,620 Mr. Rice will have from his farm. Other than these returns he has had his home, his garden, his fruit, and his fuel. Looks like this farm paid.

WAREHOUSE COMPLETED.

—By the time this is in the hands of the readers the warehouse for the Madison Farmers will be completed. Mr. Sprinkles is putting on the finishing touches as we write. Every farmer should have an interest in this building. There is yet time to take out stock. See any of the directors, John F. Bryan, J. B. McDevitt, R. A. Edwards, Floyd Cassada, Jas. Wallin, and give them your subscription. Do it now.

FIRST LOAD FROM WAREHOUSE.

—J. H. Stines has taken the lead in patronizing the new warehouse. He loaded a load of fertilizer out of the building on last Thursday, the first of the many that will follow.

Fertilizer was unloaded from the car to the warehouse on that morning. It will be kept there ready to deliver to anyone for cash. Also cotton seed meal, wheat bran, shorts, dairy feed, poultry feeds, can be purchased at any time.

PATRONIZE THE FARM-YOURSELF.

TRANSPORTATION!

The Chevrolet Red "O.K. That Counts" Tag Protects Your Used Car Purchase.

Every reconditioned car we offer for sale is identified by means of the Chevrolet red "O.K. that Counts" tag. This tag is the purchaser's assurance that the car to which it is attached has been gone over carefully by expert mechanics—that it has been thoroughly reconditioned—and that the price is based on the car's actual ability to render service.

Due to the overwhelming popularity of the new Chevrolet Six, we have on hand at this time an unusually large group of these "O.K.'d" cars. Come in! You are certain to find the car you want—at a price that will save you money. Make a small down payment and drive your car away!

USED CARS with an O.K. that counts

the farmers since July 1st, was employed by the Board of Directors at their meeting Saturday. When in need of fertilizer, feeds, seeds, or when you want to sell eggs see Emmet.

PHOSPHOROUS, POTASH DID IT.—"Every year," says Wm. S. Rice, "our sweet potatoes went to tops. There were not many potatoes. Last spring I did not use any nitrogen in my fertilizer for sweet potatoes; I use potash and phosphorous. Mrs. Rice says she wants me to grow them next year the same way."

Sweet potatoes need potash, they need phosphorous, to make roots.

TWENTY FOR ONE.—Would you like to spend \$1 and get \$20 back? That is what Mr. Rice received for spraying his apples.

You have seen the exhibits in the banks. Mr. Rice tells us that he sold 5 bushels of apples from the unsprayed tree at an average price of 50 cents per bushel. On the tree he sprayed, a tree of the same variety of apple, a tree growing next the unsprayed tree, Mr. Rice sold 11 bushels of apples for \$2 per bushel, \$22 in all.

Mr. Rice says that the cost of spraying this tree would be between 75 cents and \$1. This leaves a net profit on the sprayed tree over and above what was received from the unsprayed fruit of \$18.50.

IT WORKED.—Claude Wild,

Chairman of the Board of County Commissioners, was in the office on Monday. "I asked you last spring what to use on my corn. You recommended phosphate, potash, and soda. I told you I was going to follow your directions and if I didn't secure results was going to blame you. Guess I'll have to give you the credit," said Mr. Wild. "I had limed the field, and then used 200lb of superphosphate (16 per cent acid), 33lbs of potash, before planting, and later when the corn was between knee and waist high, applied about 100lbs of nitrate of soda. The corn in the field in question never got high enough to cut before this year. This year it was extra tall and well eared."

EDUCATION WEEK TO BE OBSERVED IN NOVEMBER

Washington, D. C.—The ninth annual observance of American Education Week will be held November 11-17, under the joint sponsorship of the National Education Association and the American Legion, according

YOUR EYES—AND YOUR WORK

Our eyes do most of our work and usually they receive the least care. People who take care of their eyesight in Youth will enjoy comfortable vision in later years. Make it a rule to have your eyes examined regularly. When you do need the aid of glasses, for special work or for constant wear, you will find our charges most moderate for dependable service. **SAVE YOUR EYES. HAVE THEM EXAMINED**

to the October Journal of the National Education Association.

The purpose of the American Education Week celebration is to keep before the public the aims, needs and achievements of the schools. The theme of the program, built around the relationships of the home and the school, emphasizes the contributions of education to worthy home membership.

The National Congress of Parents and Teachers, which is cooperating in the activities of the week, defines the ideal home as one that is "economically sound, mechanically convenient, mentally stimulating, artistically inspiring, founded on mutual affection and respect, a place of unselfish love and service."

ANNOUNCEMENT

I wish to announce that I have arranged with Dr. W. H. Gillmore of the Gillmore Clinic of Detroit, specialist in the new curative non-surgical treatment of varicose veins and ulcers to hold a clinic for the examination and treatment of these conditions at my office during the week of October 21st to 26th.

Registrations are being made now. All examinations and treatments are conducted privately. No charge for interview or examination.
