Calvin R. Edney -

(Continued from Page One)

Edney was State Senator from he 30th District in the Genera Assembly during the 1945 and 1952 essions.

A rative of Madison County, he worked on the farm, in coal mines, umber camps and railroads to raise ands for his education.

After graduating from the Yancey College Institute in Burnsville in 1913, he attended Mars Hill College n 1913 and 1914 and the University of North Carolina from 1913 to 1917.

Fidney taught at Mars Hill Colege from 1919 to 1921 and enrolled igain at the University of North Carolina from 1921 to 1923, where ie was awarded the Bachelor of Arts and Masters of Arts degrees

He was granted a license to pracice law in 1924 and was engaged n the insurance and real estate ausiness from 1924 to 1927. He was field representative for the Fedral Land Bank and the Atlantic oint Stock Land Bank from 1928 o 1931.

The former state senator had since 1931, and had been a candidate twice on the GOP ticket for Congress in the 10th district.

In addition to his law practice, he farmed and raised cattle.

He had served as chairman of the Madison County GOP executive committee for many years.

He was professor of history and economics at Mars Hill College from 1919 to 1921 and professor of history and economics at Carson-Newman College from 1923 to 1924.

In 1947 he was listed in the International Who's Who.

Funeral services were held today (Thursday) at 2:30 p. m. in Mars Hill Baptist Church with the Rev. D. D. Gross and the Rev. Hoyt Blackwell officiating. Burial was in the Mars Hill Cemetery.

Pallbearers were Dr. W. A. Sams, J. L. McElroy, Ernest Teague, Lyman Martin, Hubert E. Roberts, George Pennell, W. R. McLean and Harold Bennett.

Honorary pallbearers were mem bers of the Madison and Buncombe County Bar Associations, Gov. Luther Hodges, Sen. Carroll Reece and Fred McIntire.

Surviving are the widow, the forner Miss Palma Carter; two sons, Calvin R. Edney Jr. of Marshall, and Greenwood Edney, a student at the University of North Carolina.

Also one brother, E. J. Edney of East Flat Rock; and three sisters, Mrs. Jeannie Smart and Mrs. Harve Elkins of West Asheville and Mrs. W. E. Caldwell of Roanoke,

SHUPE PLANING

Management, Work Stressed For Good Grape Harvest

Were your grape vines loaded down with heavy tags of delicious grapes or did the rots, mildews and other diseases keep your grapes from bearing and ruin the fruit? A little work and management can still mean an abundance of delicious rrapes during the coming season. Although it is late to prune and the vines will bleed some the vines should be prune dimmediately if they haven't already been pruned.

Last year's growth are the fruiting canes and they should be cut back to 8 to 10 buds with two canes left for each trellis wire plus, two more canes for each trellis wire which are cut back to two buds to serve as renwal spurs during the following year.

Authracnose, Black rot, mildew, berry moth and leaf hoppers are the most common diseases and pests of grapes. Spray the vines in late spring before the buds open with 14 pound een practicing law in Marshall bluestone in two gallons of water of the 1956 program policy be refor control of anthracnose. When the new shoots are one to two inches long spray with bordeaux mixture using ¼ pound bluestone and ¼ pound of fresh hydrated lime with three gallons water, repeat when the new shoots are 7 to 10 inches long. Just before the blossoms open spray with same mixture plus, one ounce of 50 per cent wettable DDT powder to the three gallon spray, repeat after the bloom petals fall, and, in 10 days

spray again with the same mixture. Using a mixture of two ounces bluestone and two onces of fresh hydrated lime to three gallons water, spray at two week intervals until two to three weeks before harvest. The first spray controls anthracnose. The bordeaux mixture controls anthracnose, black rot, mildew, and other rots. DDT is used to control the berry moth and leaf hopper. In mixing the bordeaux mixture slowly add finely powdered copper sulphate to water in spray tank. While stirring vigorously add lime, then add insecticides last. Keep mixture well stirred until used.

The fact that a politician is alhas a clean record.

Group Developes Recommendations For 1957 ACP

tural agencies, farm organizations and others interested in the Agricultural Conservation Program atpurpose of developing county recommendations for the 1957 ACP.

Those attending the meeting were: John Nesbitt, SCS Technician; W. K. Anderson, FHA Supervisor; R. W. Miller and L. V. McMahan, Assistant County Agents; Coy Morgan Jack Payne, County ASC Commit- nette ditto, a package of curry powteemen; B. R. Farmer, ASC District Fieldman and Ralph W. Ramsey, County ASC Manager.

After studying the basic principles and policies set forth in the National and State bulletins for the 1956 ACP, the county group unanimously agreed that the following recommendations if approved would better the 1957 program for farmers of this area of the State. 1. That program principle No. vised to permit the following practice changes for 1957:

(a) That the initial application or establishment concept be elimin- the rate of Government cost sharing ated for practice No. 1, 3, and 6.

(b) That a practice be included in the 1957 program for the application of conservation minerals to vegetable cover and in this practice allow cost sharing for the use of phosphates and fertilizer on land on which the terrain is such that the application of liming materials is difficult. It is a known fact that the application of phosphate and a fertilizer of mountain pastures in this area without the use of lime. 2. The group recommended that

where practice No. 2 in the State Handbook (A-3) is used in a rotation which includes Burley tobacco and/ or Irish Potatoes, that the application of liming materials not be required.

3. The group recommended that the Federal cost share for practice 14 (D-1) be revised to permit the cost share to be 50% of the average cost of performing the practice.

4. The group recommended that ways in hot water doesn't mean he the State ASC Committee include practice B-3 of the National practices

KIDS RACE CAR

Pittsburgh, Pa. - Police chased car 15 miles at speeds reaching 90 miles an hour before being able to A meeting at which representa- halt it. Two boys, James Fleming, tives of each of the county agricul- 13, and his companion, Victor Rerosana, 12, were taken into custody on multiple charges. The boys, neither of whom is 5 feet tall, were turned tended was held last week for the over to juvenile authorities and the car was returned to Fleming's mother.

STRANGE THINGS LEFT

London - Among the strange articles which have left on British Ov-County Farm Bureau President; erseas Airways Corporation's planes Novile Hawkins, Mallie Brown and are: A woman's blond wig, a bruder wrapped in a bath towel, one spear, one boomerang, one Australian Bushman's club and one empty bird cage.

> in the State bulletin of practices for 1957.

5. It is the thinking of the group that if the Soil Bank Bill is enacted that most of the 3,000 farmers in Madison County will benefit very little, if any, directly from the soil program. We do feel, however, that the ACP allocation for counties like Madison should be greatly increased and if this can be done, we feel that for carrying out needed soil building practices should be at least 75% of the cost until agridulture goes through the period of adjustment whereby farming is more profitable.

The Department of Agriculture Appropriation Bill, which is now before Congress, contains a proposed authorization of 250 million dollars of the 1957 Agricultural Conservation Program. No proposals are inilizer will improve the stand and cluded in the bill which would necessitate any major changes from the 1956 program. Early approval of the 1957 National Bulletin and State programs are expected so as to provide a better oportunity for program explanation and administrative planning and according to Ralph W. Ramsey, ASC office manager, the participating farmers will be in position to take advantage of the benefits of concurrent operation of the 1955 and 1957 programs. It is therefore anticipated that work will be gotten underway at an early date for the development of the 1957 program at the National and State
