Jeter P. Ramsey Suffers Fractured Ankle Saturday

Jeter P. Ramsey, former sheriff of Madison County, suffered a fractured ankle and knee injury Saturday when he accidentally fell while working at his home.

NEW REGISTRAR IS APPOINTED AT MARS HILL

Robert R. Chapman, assistant registrar of Mars Hill College since 1947, has been named successor to John W. Huff, who has resigned as registrar.

After graduation from Mars Hill, Chapman attended Furman University where he was graduated in 1947 with a B.A. degree.

Chapman holds an M.S. degree from the University of North Carolina. In 1950-51 he was on a teaching fellowship at the Woman's College of U.N.C., Greensboro...

Chapman is a member of the Delta Pi Epsilon, national fraternity of business education, and served as chairman of the Junior College Division of the Southern Education Association in 1953.

Coming to Mars Hill in 1947 as a member of the business faculty, Chapman is adviser for the "Laurel," college yearbook, and is business manager for the Touring Choir.

He is married to the former Miss Rachel Ruth Messick of Yadkinville, who is also on the Mars Hill College faculty in the business department. They have two daughters, Susan Rachel, 4; and Melanie Ruth, two.

John W. Huff Resigns Registrar's Post At M. H. C.

John W. Huff, Mars Hill College registrar and professor for the past 30 years, has announced his resignation as registrar.

He will continue as professor of Latin, which post he has held for 32 years.

Born and reared at Travelers Rest, S. C., Huff was graduated from North Greenville Academy in 1906, and received his A.B. from Furman University in 1911.

Prior to becoming a member of the faculty of Mars Hill College in 1924, Huff was for seven years dean of Yancey Collegiate Institute and before that served as principal of three South Carolina schools.

He is married to the former Mary Alice Bramlett of Travelers Rest, South Carolina.

The Huffs have four children: Mary Alice, catalogue librarian at Appalachian State Teachers College; John W. Huff Jr., businessman in Greenville, S. C.; Mrs. Ray Jarvis of Baltimore, Maryland; and the late William B. Huff, who was killed in action during World War II.

Since 1926, the year in which he accepted the administrative staff position, Mr. Huff has played the double role of registrar and professor, serving as instructor of Latin and geography for thirty-two years. During the commencement finals of 1954 he was awarded the engraved, silver letter-opener which is presented to each person having served the college faithfully for at least twenty-five years.

Mr. Huff heads the ancient language department of the college and will continue as professor of his beloved Latin.

Robert R. Chapman, assistant to the registrar since 1947, will succeed Huff.

Hot Springs Teachers Omitted

In the list of teachers published in last week's issue, the names of Glenwood Wallin and Mrs. Jewell J. Church were inadvertently omitted from the Hot Springs list.

HUNTERS SAVED BY SNOWFLOW

Ogden, Utah — Nine hunters — eight men and a woman — were stranded at an isolated ranger station by a heavy snowstorm.

Soil Bank Agreement Forms Now Available To Tobacco Growers

Agreement forms for the new Soil Bank Acreage Reserve program are now available to farmers at the Madison County Agricultural Stabilization and Conservation office in Marshall. They must be signed not later than July 20 if the farmer wishes to take part in the Acreage Reserve during the 1956 crop year...

The Soil Bank is a new feature of the national farm program authorized under the farm bill recently enacted. Its objective is to encourage farmers to reduce crop acreages and thus help overcome farm surpluses that are depressing the market.

Of particular concern in this area at this time is the Acreage Reserve program for tobacco. Even though 1956 tobacco planting has been completed, producers can make adjustments and earn Soil Bank payments this year, Mr. Hawkins said. He emphasized, however, that no farmer should attempt to comply without checking at the county office and signing an official agreement with the Department of Agriculture.

In future years, land will be placed in the Acreage Reserve in advance of the planting season and will not be planted in crop. For this year only, Mr. Hawkins said, a farmer may participate by not harvesting acres which suffered from weather damage or by plowing under a portion of his tobacco acreage not later than July 31, however, the agreement must have been signed by July 20.

The compensation rate on burley for destruction due to natural causes (hail, floods, drought, etc.) will be based on the SMALLER of the appraised yield or the normal yield for the farm times 18 cents per pound. The chairman explained that in appraising the yield for a crop destroyed due to natural causes, that the appraised (estimated) yield would be based on the actual condition of the crop AFTER the damage or destruction took place and that in the case of total destruction the appraised yield would be zero.

Mr. Hawkins said that some farmers who had damage due to hail or flood had the impression that the compensation would be based on the severity of the damage whereas in reality according to the regulations the compensation would be on the appraised yield of what was left after the damage occurred.

The Acreage Reserve payment for tobacco is determined by multiplying a rate per pound times the normal yield of the farm times the acreage placed in the reserve. The maximum payment per acre which can be earned is based on a yield of 115 per cent of the national average yield for burley tobacco. The rate per pound for burley is 18c.

"The 1956 Acreage Reserve program is in many respects a special one with provisions to meet the time (Continued To Last Page)

THE NEWS-RECORD TO INCREASE SIZE TO 7 COLUMNS

The News-Record will next week change from a six-column per page newspaper to seven columns per page. It was announced this week.

210 GALLONS OF WHISKEY TAKEN AT HOT SPRINGS

Patrolman F. F. Bowen and Policeman Leroy Johnson of Hot Springs, apprehended a 1953 model Chevrolet pickup truck early Monday morning near the Hot Springs bridge and discovered that the truck was loaded with 35 cases (210 gallons) of non-tax-paid whiskey.

The only occupant in the truck was Mr. Forester of Newport, Tenn. Forester was arrested and placed in the Hot Springs jail.

NEW SOIL BANK PROGRAM GIVES ACREAGE RESERVE

If you have a tobacco allotment you can place all or part of your allotment in acreage reserve under the new soil bank program, M. P. Zuver, assistant farm agent said this week.

1. Three ways of participating are: a. Due to adverse weather conditions; b. Due to anticipation of participating in the soil bank program.

2. By destruction of an acreage of tobacco by natural causes — hail, flood, etc.

3. By producer disposing of acreage of tobacco.

Under the provision for underplanting the producer will be paid 18c per pound on his normal yield which consists of the three highest yearly yields in the last six years. In most cases Madison County farmers would draw the maximum of \$340 per acre under the underplanting provision.

To participate due to destruction of acreage by natural causes such as hail, flood, etc., or by producer disposing of his acreage — an appraisal must be made by the ASC office to determine if he has a normal crop or what per cent of a normal crop he has.

If the producer is disposing of an acreage which is considered a normal crop he can draw up to the maximum of \$340 per acre. If the producer crop was completely destroyed by hail he would be unable to receive payment because he is paid 18c a pound on the percentage of the normal crop he has left. If there is no percentage left, there is nothing left to pay on.

If the crop was damaged 75% he would be paid on 25% of his yield or the average state yield at 18c a pound. If his normal yield was 1800 lbs., he would receive 18c a pound on 450 lbs., or \$81.00 provided he destroyed the acre of damaged tobacco.

In order to participate on acreage destroyed by natural causes the destruction must have occurred before July 20.

The deadline on disposing of tobacco in order to take advantage of acreage reserve payments is July 31. Participation will not reduce future allotments.

Donald Funking Joins French Broad Ranger District On Monday

Donald Funking, of Hartdale, N. Y., Monday started his duties in the French Broad Ranger District. He will be replacing Forest Ranger Ed Ellen.

Funking is residing at Mrs. Funking's home at Hot Springs.

L. Cantrell, Craig Burnette, Eugene Laws, Marvin Waddell, Edward Ray, C. D. Edwards, Mickey Miller, Bob Robinson, Douglas Buckner, Jimmy Ray, Woody Ammons, E. B. Proffitt, J. P. Robinson, Neal Willis Jr., Bob Wood, Butch Sams, Bruce Ramsey, Stanley Tipton, Herbert Ponder, Danny Henderson, Johnny Ramsey, Raburn Reeves, Lewis Rudisill, Byron Zuver, Johnny Corbett, Virgil Smith, Kenneth Johnson, Sammy Kizzo and Lane West.

The boys and girls will be given instructions in swimming, safety, handicraft, electricity, and leadership. They expect to return Saturday, July 14.

Patrolman Warns Motorists About Illegal Mufflers

Patrolman Long this week issued a warning to all motorists in Madison County concerning mufflers (gatted), Hollywood mufflers and Dynatone mufflers on vehicles.

Patrolman Long stated that such violations of the law shall be enforced and that this is a final warning to all car owners.

He cited the following statute concerning mufflers: Statute 20-128, Section A: No person shall drive a motor vehicle on a highway unless said vehicle is equipped with a muffler in good working order and in constant operation to prevent excessive or unusual noise, annoying smoke and smoke screens.

Sub Section B: It shall be unlawful to use a muffler cut-out on any vehicle upon a highway.

This statute was enacted by the 1937 General Assembly.

ATTEND CONFERENCE

Mr. and Mrs. J. M. Baley Jr., returned Saturday night from Hot Springs, Virginia, where Mr. Baley attended the Judicial Conference last week.

Endrin And TDE Insecticides Are Effective Now

The tobacco horn worm has always been known as a tough one to knock out with insecticides, however, Endrin and TDE are two insecticides which pack the wallop necessary to knock him out.

If you plan to spray — use Endrin 1 1/4 % emulsion concentrate. Add 1 to 2 pints to the amount of water that it takes to spray an acre with your sprayer.

When using TDE as a spray — use 2 to 3 lbs. of 50% wettable TDE powder or 3 to 4 pints of 25% emulsion concentrate with the amount of water that is needed to cover an acre with your sprayer.

Start spraying before largest worms exceed 1 1/4 inches in length, as larger worms are harder to kill. Apply insecticides to the top six leaves. Extra heavy applications should be avoided.

FORMER COUNTY LADY MISSING IN MICHIGAN

Mrs. Henderson is Last Seen Saturday; Reward is Posted

Mrs. Clyde Henderson, the former Miss Evelyn Boone, daughter of Mrs. Pender Boone of Marshall, has been missing from her home in Wayne, Michigan since Saturday night, July 7.

According to reports received here Mrs. Henderson was last seen by neighbors around 7 o'clock Saturday night.

The Wayne County Sheriff's Department has failed to find any evidence as to the whereabouts of Mrs. Henderson. The only word received has been two phone calls from Mrs. Henderson but she refused to reveal her whereabouts or the circumstances of her disappearance. In the phone calls Mrs. Henderson stated that she could not tell where she was.

The family here has posted a \$100.00 reward for information leading to the whereabouts of Mrs. Henderson.

New Dairy Program In Madison County

The Madison County producers who sell milk to Biltmore Dairy Farms, Biltmore, North Carolina, have been asked by the company to install a new system of storing milk on the farm. This system is known as the bulk milk storage tank.

Milk is poured from the milking pails or direct from the milking machines into the tanks, and is cooled to at least 40 degrees within a matter of minutes. The milk remains in the tank, at a low temperature until it is pumped into the refrigerated tank truck and transported to the plant for pasteurization.

Madison County producers in the Little Pine and Sandy Mush areas have already installed these tanks. The remaining Biltmore producers in the County have been notified to install these tanks by the 15th of September.

The Madison County Health Department approves this program because it means cleaner, safer milk from producer to plant. The sanitarian of our staff, Mr. Willard Hunter, has worked with the dairies in supervising the installation of these bulk tanks.

This is another progressing step in sanitation in Madison County.

Big Laurel Damaged By Severe Storm Monday Afternoon

The worst wind, hail, and rain storm in the history of the Big Laurel community struck Monday afternoon causing severe damage to crops. According to witnesses large trees were blown down blocking several roads in the area. Corn was blown flat as if a log had rolled over it, and great damage was done to the tobacco crops as heavy rains washed crops away.

The roof of Claude Capps' home was blown off and the roof of the barn of Benny Gunter was greatly damaged.

An estimate of the total damage done by the storm runs into the thousands of dollars.

Neshitt Named Scoutmaster By Civitan Club

The Marshall Civitan Club held its regular luncheon meeting Tuesday at the Presbyterian Church.

Following the usual social program, motion pictures were shown and the club named Jim Neshitt to represent the club at meetings of the United States Boy Scout Council and to fulfill the duty of the representative.

John Neshitt, son of William Neshitt, of Marshall, was named Scoutmaster of the local pack.
