TOBACCO CARDS TO BE MAILED THIS MONTH

As a special service to the county tobacco farmers this year, farm operators of Madison will receive their 1956 marketing cards by mail, Noville Hawkins, chairman of the County ASC, announced today. Ralph W. Ramsey, issuing officer for the County ASC Committee, said that so far as he knew, this would be the first time in the history of the marketing quota program that cards would be issued to the producers of this county by mail. Ramsey said that his office staff plans to have the marketing cards completed and ready for mail by November 16, which means they will reach the farm operator on or near the 17th.

It is not definitely known at this time what date warehouse sales will begin, however it is assumed that they will start during the last week of November or the first week of December, as usual.

Ramsey said that the cards were being mailed more or less on a trial basis this year and that if the plan works successfully they would probably be issued by mail in the future. He also urged farm operators to be on the lookout for a letter containing their card about the 17th, and cautioned operators about misplacing or losing their cards, since considerable trouble and time will be required in securing a duplicate. Since memorandums of sales taken from these marketing cards are used in identifying each sale and as a means of properly identifying and accounting for the disposition made of the tobacco produced and marketed from each farm, the cards with all unused memorandums must

Marshall High 4-H Club Elects Officers Monday

be returned to the ASC office after all marketing for the farm has been completed. Failure on the part of the farm operator to properly use and return his card after completing his marketing constitutes a violation of the marketing quota regulations for which he is subject to penalty and reduction of his allotment.

In conclusion it was pointed out that only within quota cards would be mailed to the producers, and that excess or zero percent excess cards would be issued to the operators at the ASC office. It was explained that an excess card is one for which penalty (tax at 44c per lb. on the excess) must be paid on the tobacco in excess of the farm quota. A zero percent card is one on which no penalty is due, but the farm is ineligible for price support because the operator failed to act within the 10 day limit in making application to dispose of his excess acreage. The 1956 record reveals that the 1200 farms which exceeded their quota, all but 4 farms voluntarily disposed of their excess acreage so as to evade payment of the 44c per lb. penalty on the excess.
