ACP Cost-Sharing Now Available On Cover Crops

Farmers within Madison County who have need for establishing a winter cover of crimson clover or annual ryegrass may secure government cost-sharing on such practices by making written request with the local ASC Office at Marshall. Noville Hawkins, Chairman of the Madison County ASC Committee stated that this policy recently adopted by the ASC Committee applied to both the participating and non-participating farmers and urged all interested farmers to contact the ASC office for the details and the filing of their request. He also explained that farmers who are not now participating in the 1960 ACP would be eligible for help on any of the county's soil and water conservation practices that are performed at this season, should they have a need and desire to file a request.

PREVENTION OF INSECT DAMAGE URGED BY AGENT

According to James M. Stewart, assistant county agent, "An ounce of prevention is worth a pound of cure." This adage applies for many tobacco farmers in controlling insects on tobacco. Each year, nearly every farmer in the burley area has to contend with flea beetles, cutworms, budworms and hornworms.

Henry Davis, a tobacco farmer in the Bluff community of Madison County, believes he is well ahead by treating regularly to prevent insect damage rather than using chemical after he has received damage. By doing this, Davis says, "I can prevent insect damage and can control insects while they are small."

Tobacco farmers can prevent flea beetles, cutworms and budworm damage with 5 to 8 pounds of 10% DDT dust or one-fourth pound of 50% DDT in 9 pounds of meal, per acre. In addition to these chemicals, budworms can be effectively controlled with 10% TDE at the rate of 5 to 8 pounds per acre. TDE is a contact material used at the rate of 15 to 30 pounds per acre, is also effective in controlling hornworms. For additional information, farmers should contact the county agricultural agent's office.

Excess Tobacco Producers Should File Application

Farmers who receive notices of excess tobacco acreage should file application for remeasurement or disposition within the ten day period if they wish to retain the benefits of price support on their 1960 crop of Burley tobacco, according to Ralph Ramsey, Office Manager of the Madison County ASC Office.

Excess notices mailed to producers show the final date on which application for remeasurement or disposition may be accepted, and farmers should not let this date pass without making application. The minimum charge for per farm and the minimum charge witnessing dispositions is \$5.00 for remeasurement is \$8.00 per farm.
