In the open test that tears 'em apart...the Daytona 500

Daytona is no "private" test arranged by a manufacturer to favor his car's strong points. It is open competition—anyone can enter—and the one thing that is proved by its searing 500 miles is just exactly how well a car hangs together. At Daytona, Florida, on February 24, five brand-new 1963½ Fords showed the world what durability means by sweeping the first five places. And that has never been equaled in Daytona history!

The box score at the left tells the true story...car endurance that takes brutal punishment and comes back for more. No proving ground can equal this kind of torture. Daytona was a challenge we welcomed, a chance to prove in open competition the essential durability that makes possible the silence, the solid road-grip, the ease of control, the balanced braking...and

all the other things that go into Ford's concept of total performance.

These were the same '63½ Super Torque Fords that made styling history at their preview at Monaco, and which were recently announced at your Ford Dealer's. They're yours now, get behind the wheel and find out for yourself what total performance means!

IF IT'S FORD-BUILT, IT'S BUILT FOR PERFORMANCE...TOTAL PERFORMANCE
