### By DANIEL GRANT (Biblical Recorder)

The commonly held notion by Christians and non-Christians alike that "politics is dirty" is as persistent and universal as the existence of government itself. Simply to mention politics is to cause visions of corrupt payoffs dishonesty and evil scheming in a tics is dirty because everyone simply accepts it as a strong assumption; they know politics is dirty.

For the jokester it is always open season on the politician, with probably more jokes about the dishonest politician than any other single category in the joke books of the world. What politician has not been reminded for example, who, when bought, stays bought.

If politics is dirty, why do we never hear it said that "democracy is dirty?" In twenty years of teaching about government and politics, I have not heard a single person make the statement that democracy is dirty, even though politics is the process by which carefully and don't forget the man people rule themselves in a democracy. Why, then, is there such paradoxical agreement that politics is dirty?

Label Is Reserved

Actually this notion could be accepted if one means by it that mankind is dirty, or sinful, and that therefore all human institutions are "dirty" in this sense. But an honest observer would have to report that people predominantly reserve this label for politics and
