A PROMISE TO THOSE PEOPLE WHO DO CARE ABOUT TOMORROW.

A promise to do more than talk: too many people are already doing just that.

A promise to take part in making tomorrow all it should be.

To help keep North Carolina what it's always been. One of the garden spots of the South. Of the Country.

There is pollution here.

Not nearly as much as you'll find elsewhere. But enough to arouse some worry.

So. We're looking for opportunities. Opportunities to help business clean things up.

Wherever possible, we're making every effort to extend additional credit to concerned companies.

There is nothing that says these companies have to increase their financial obligation. But they're doing it. Because they feel a strong obligation to North Carolina.

And to you. It may take a little more effort to protect the good life.

But it's worth it. It's worth it to make tomorrow everything we want it to be. Everything we know it can be.

Let's make tomorrow together.
