New Measles Vaccine To Be Given

Lawrence B. Burwell, MPH, Madison County Health Director, has announced the Health Department will administer the new combined Red measles (Rubella) and German measles (Rubella) vaccine in all Madison County Schools. The school immunization program is being conducted in cooperation with the Madison County Medical Society and the Madison County Board of Education.

This new, one-dose vaccine gives protection against Red measles and German measles at the same time. It has never been given in school before. Any child between the ages of six and 12 years who has not already had both a Red measles and a German measles immunization should get the new vaccine. The one-dose vaccine is effective whether a child needs only a Red measles immunization or only a German measles immunization or both immunizations. If a parent is not

sure his child has had both immunizations, the child should be given the vaccine.
