The 1980 Baseball Season: Coach Brown's Assessment

By JACK BROWN Varsity Coach

The 1980 Madison baseball season began as the Patriots visited Owen. Jack Brown and Larry West are the coach The team is led by five seniors, Tim Wilde, Andrew Anderson, David Massey, Bob

Frisby and Roger Tweed. These are the best group of boys we've had since 1976. Their attitude is the biggest plus. They will play together as a team.

Pitching is a necessary part of any team, probably 90 percent of the game. Our team's pitching looks good on paper. Tim Wilde is the mainstay of the staff. Tim has worked on his control and we look for him to have an outstanding year. Tim Clark will be our other starter. If he can adjust quickly to varsity ball he'll be a definite plus. Tim Merrill and Jeff Baldwin are our remaining pitchers. They have both looked good lately. Each will be a spot starter and relief pitcher. Jeff has a strong arm and is the team's second cat-

lifestyles are changing.

drive.

cher. In addition to pitching, Tim plays right field and first

The hitting also looks good this season

Position by position the team looks this way: Steve Fish is the starting catcher. He's smart and has a quick release on his throws. Fish is also counted on to hit well this season, Baldwin will also see time at catcher. Jeff is good with a glove and is working on his quickness. At first base-Andrew Anderson will start. Andrew is big and strong and hits with a lot of power. Tim Merrill will also see time at first. He's quick and very good with his glove. We need Andrews bat to help carry the team plus a lot of leadership. David Masey is the starter at second base. David is the

most consistent hitter on the team. He always makes contact. Davis is also good with his glove and has a strong arm. Keyin Johnson will also play at second. Kevin is a contact hitter and will push to start. The shortstop position isn't

settled yet. Lonnie Kent and **Use Of Family Car**

Is Changing Rapidly

Kevin Barnette are both good candidates for the job. Each has a strong arm and quickness. And each makes contact when he bats. They both will probably start

Tony Mitchell will team with Tim Wilde at third. Tony is quick and is a competitor. His throws to first are hard and accurate. Tim is one of our leaders. He talks it up and takes the leadership upon himself. He has the arm nerded at third. Bobby Frisby will start in

left field. Pete (Bobby) has started for three years. He is probably the best all around player on the team. He's very coachable and he leads by example. Ronnie Kent will play in center and right field. He has a strong and accurate arm and is quick.

center field and D.H. Roger is a streak hitter. When he's hot he hits everyting in sight and with authority. We need a big year from Roger.

will share duties in right field. Merrill is expected to have a big year. Tim is fast, strong and has to carry part of the load. He wouldn't have it any other way. Clark hits well in addition to his pitching. It will be hard to keep him out of the lineup even when he isn't pit-

The all-purpose family car A Swedish car manufacturer is developing an engine has been a central part of the American lifestyle. And that would use turpentine as fuel. By 1981 in Brazil, one-Until catalytic converters sixth of the country's cars will were mandated in the 1970's be running on pure alcohol, car exhaust was a chief cause say the experts. of air pollution, according to Whatever new fuels and car

the American Lung Association. Now skyrocketing prices and fuel scarcity are altering the way we live and what we Gasoline production will reach a peak in 1982, predicts

the Stanford Research Institute in California, then decline throughout the rest of the decade. The importance of the family car, they say, will travel the same downhill

course. In the 1980's, the Institute predicts, a wider variety of vehicles - including motorbikes and electric cars - will be used for short distances. Larger vehicles would be for longer trips. But many will be leased rather than owned.

The car of the 1980's says the Institute, will be made of heavy-duty plastic. Because it is lighter than today's metal cars, it will use less gas. Lighter cars are also more adaptable to battery power. One major manufacturer is already testing a hybrid vehicle that runs on battery power at speeds up to 20 miles per

designs are used, a vital consideration is curbing the amount of pollution they create, says the lung association. New lifestyles - and car engines - should help protect healthy lungs.

To find out more about curbing pollution in your community, contact your local American Lung Association the Christmas Seal people. It's a matter of life and breath.

Roger Tweed will be in

Tim Merrill and Tim Clark

ching As I said, on paper the team looks very good. But we have no field of our own to practice on. We are using the town of Mars Hills field. The infield is in no condition to practice on at this time and we've only been on the outfield grass. Four games have been cancelled due to weather conditions. We need to play now, but may have to wait until our first conference game to start. I do feel the county will be well

represented by our team and we will play an exciting brand of ball. Our seniors are the

rill, Tony Mitchell. Back Row: Roger Tweed, Bobby Frisby, David Massey, Andrew Anderson, Tim Wilde, and Trainer Larry West.

Correction

In last week's edition of The News-Record it was mentioned that a false alarm had been phoned in from Walnut Creek by a "sick" or "mean" person. In fact, this phone call was made with every good intention by a person who honestly though he saw a fire. The fire, although bright and flaming, turned out to be confined to a fireplace.

John Wise of Pennsylvania, an early balloonist, recognized the existence of the jet stream as early as 1842. He told Congress in 1843 that "there exists in the atmosphere a constant current of wind, moving from
