LAND FOR LAND EXCHANGE
 Notice is hereby given that the Forest Service, United States Department of Agriculture, is considering an exchange of land with Herbert H. Hunter and wife Donna Hunter under the authority of the Weeks Act of March 1, 1911, as amended (16 USC 516), and October 21, 1976 (43 USC 1717). The land under the jurisdiction of the Forest Service that is being considered for exchange is described as:
 All that piece or parcel of land located on the waters of Jack's Branch, a tributary of Spring Creek, in Township Number 8, Madison County, North Carolina, being also a portion of United States Tracts 472e, 472e-1, and 472e-11, as recorded in Deed Book 62, page 78, Madison County Registry.

The Hunter tract is described as: All that piece or parcel of land located on the waters of Coon Patch Branch and Punchon Creek in Township Number 8, Madison County, North Carolina, being also described as that piece or parcel of land described as 30 acres, and recorded in Deed Book 26, page 567, Madison County Registry.

All tracts are located within the Pisgah National Forest, Madison County, North Carolina.
 Any or all of the above-described land may be exchanged provided the values are equal. In the event the values are not equal, either party may equalize the values by the payment of cash. The amount of cash payment may not exceed 25 percent of the value of the lands transferred out of Federal ownership.
 Persons claiming such properties, or having valid objections to this proposed exchange, must file their claims or objections with the Regional Forester, Forest Service, U.S. Department of Agriculture, 1720 Peachtree, N.W., Atlanta, Georgia 30367, within 15 days after date of the last publication of this notice.

Nicknamed the "terror bird" by scientists who found its fossilized skeleton, the 7-foot-tall Diatryma roamed the grasslands and woodlands of western North America about 50 million years ago. But it couldn't fly because its short wings were unable to lift its huge body. Instead the bird ran about on thick, strong legs, according to National Geographic World magazine.

One trained rescue dog can search the snow for buried avalanche victims faster than 20 humans can. The dog can cover an area twice the size of a football field in half an hour — eight times faster than 20 people can poke around it with sticks. In dry snow, a dog can pick up the scent of a person buried as deep as 16 feet, National Geographic World magazine reports.

THE BEST ADVERTISING

Selling your home? Then your first thought will, no doubt, be advertising it. You may start by planting a "For Sale By Owner" sign in your front lawn. But with this, be seen by enough - or any - prospective buyers?

Then - newspaper advertising. This can become more costly and less effective than you think it does if properly. It could even lead to over-exposure of the house to the point where, if you should decide later to consult a Broker, good prospects already will have seen the property and, having failed to buy, will be harder to interest a second time.

The basic reason for advertising is to attract interested prospects who are ready, willing, and financially able to buy. There's a more effective and faster way. List with a Broker! He has prospects already in the market for homes realistically priced. One of them may be looking for just such a home as yours.

If you have any questions about selling your home, land, farm or business properties, feel free to call us at any time, or drop by our office at TIMBERLINE REALTY CO., 214 Parkway BLDG., 170 Woodfin St., Asheville, N.C. 28801 OR at Box 185, Hot Springs, N.C.
