AIDS toll-free number
 Immunology is progressing so quickly, that we hope for rapid progress in controlling the spread of infectious AIDS (acquired immunodeficiency syndrome). Most health officials believe AIDS is caused by a virus. Its victims suffer from a variety of severe infections, with death the final victor. Symptoms include swollen lymph glands, rapid weight loss, fever, chronic diarrhea, skin spots, prolonged fatigue, cough and shortness of breath while at rest.
 So far, highest risk groups include homosexuals, intravenous drug users, bleeders, and Haitians. Questions may be answered by calling toll-free (800) 221-7044.

 DECISION FOR NEWLYWEDS
 Congratulations! You're engaged to be married. Decision time is coming. Shall the first day of your dreams be a cozy apartment or a comfortable home, large enough to house your projected number of offspring?
 Also reflect their alternatives. Appointment visits are available on available upon request. On top of this, the monthly rent checks represent money that is gone forever. On the other hand, mortgage payments are a form of forced savings and actually build up equity for you. Also you can probably sell forward to a profit when you eventually sell.
 Don't other consideration is the cost of ownership versus each time you must pay larger quarters. This expense must convincingly cost you every penny you thought you were saving by paying less for smaller quarters.
 Either way you decide - have a happy honeymoon!
