Show Kindness While You May

If down in your heart you are that tul about anything, will you show the kindness to everybody connect with you and your own personality by giving an honest, sincere tression of your gratitude? The man who dies with all the thankfulness him is as deserving of pity as the one who stifles all the music. Don't be afraid to say "Thank you,"

I have in mind a family that allows the mother of the large circle to wear herself out with uncessing wast. She worked so hard and long that she never had time for considering a rest. The members of her family regarded mother's work as a half. They accepted her working and never thought that she needed relation or a change from the monotonous grind of keeping a home. They added to her burdens by bringing others home with them. Mother smiled and worked a little harder. Then one day mother did not come days to shake the fire and prepare the breakfast. She had closed her eye, and they were so tired that she

i wish you could have heard the stied gratitude at the funeral. I wish you could have seen the construction and despair when the chiliron and father looked at each other and said: "What are we going to do without her?" They were filled with regret. The ears could not hear the thanks they poured out. They should have shown their gratitude every day of the year and in time & Look over your own life. Are you speaking and acting in time!

You are living in a great country and are indeed fortunate in having freedom, the right to think and to the opportunity, countless chances to forge to the top if you have it in you. You have libraries, play-grounds, achools. You have your min your dear sympathetic souls in relatives or friends and the ideals which are necessary to any human being's happines. Do you fully appring the the good fortune that cast your lot over here? Are you taking the trouble to express your thanks every once in a while? You ought to this, It is good to get it out of your system.

Have you health? Be ankful in the right way. Do not throw to the winds of indiscretion your presional heritage. Do not insult your good health by eating, drinking, breating the wrong things. Cut out dissipation and lead a sane, balanced clean, normal life. Prize that good health. Sometimes it leaves in high duageon and never returns. And all the poulticing and nursing may not bring back to you that which should be appreciated every hour of the day. The way to thank your good

I mentioned ideals a minute ago. Heve your ideals suffered from disuse? Where are your ideals? Are they stowed away in camphor to be brought out on Sunday when you gate church? Why are they not being eared for in the case they have been sonderful thing. daily influence on your thoughts and sots. Bring them into the light of day and make them important con-tribution factors of your happiness and success as a human being. You many not be getting so much money as your next-door neighbor or your hat may not have the bel of of an exclusive maker in its crown, but as a human being filling a niche in the great scheme, your ideals should be thanked every hour Thanking them is really shaking hands with them.

If you are a woman who rides in a street car, do you thank the enlightened gentlemen who rise to give you a seat? Or do you make them very recomful of the weaker sex by taking it as your due? I have seen many men converted to the paper gazers and the seated matculine row by the neglect of women to thank the men. Say it graciously and as if you meant it. Good heavens! the cause for a thank you of this kind is growing more remote. Let us cherish it.

A stranger is entitled to a thank you when he has rendered you a service. Do not be an insufferable snob and accept help silently because you have not been introduced or because his fathers might not have come over in the Mayflower. Say thank you smilingly and be human!

Do not forgot to thank in the right way the children. It is only in the respectful use of a courtesy of this kind that children will adm re

Indeed, the thank you of every day is that which makes thanks go smoothly. It is such a little thing that it should never be forgotten Try saying thank you once every day. Look around. You will find something which should elicit your gratitude.

And thank you for listening. -BARBARA LEE.
