******* ********* NEWS OF MORTH CARLINA

Plans

Asks All Citizens to Rally to Aid of Government in This State

The most ambitious organization ever perfected in North Carolina is being built up by Food Administrator, Henry A. Page, for carrying out the program of the Rederal Food Administration in this State, an army of approximately 25,000 active workers being contemplated.

The fact that the great war can never be won without the active cooperation and aid of the people back home has steadily become more apparent and Administrator Page and his assistants have been working under high pressure to hasten the perfection of the organization in North Carolina.

The plan adopted by Mr. Page calls for the appointment of a Food Administrator for each of the 100 counties of the State. These country food administrator for each of the 100 counties of the State. These country food administrator for each of the 100 counties of the State. These country food administrator for each of the 100 counties of the State. These country food administrator for each of the 100 counties of the State. These country food administrators will have an exceptive committee of aight members corresponding with Mr. Page and embracing the state of the counties of the State. These country food administrators will have an exceptive committee of aight members corresponding with the committee working with Mr. Page and embracing the state of the State. These country food administrators will have an exceptive committee of aight members corresponding with the committee working with Mr. Page and embracing the state of the State. WILL NOT SEIZE HOME

WILL NOT SEIZE HOME
FOOD
There is no truth in a widely circulated statement that
the government expects to
take food supplies from any
family. Both the Food Administration and the Department of Agriculture join in
a statement to counteract what
seems to be a deliberate propagands to the affect that the
Government intends to take
from every-family all caused
goods put up in excess of 100
quarts.

goods put up in excess of 100 quarts.

This is only one of the variation of the rumer, which has been widely obveniated. Another statement is that the Government has been urging the causing, drying, and preserving of fruits and vogetables so that they will be in a convenient form for the Government to handle and transport when it takes them away from the people. Further elaboration is that these goods are to be taken from the Amorican homes and shipped to England.

England.

SPECIFIC INSTANCE CITED.

In one instance a motorist stopped at a farmhouse to fill the radiator of his automobile in the course of conversation he carsully inquired whether the farmer's family was emming all the surplus fruits and regatables in order to help conserve the feed supply. He was informed that the farmer was not doing this because the Government intended to take all the canned goods away except a small part of it actually needed by the family itself.

The authorities state amphatically that no such course has ever have contemplated by the Government. On the contrary, both the Department of Agriculture and the Food Administration are strongly urging hossewives to can said preserve, especially at this time, all outsplus fruits and vegetables, in order that the households thomastves may have a chose plentiful supply of food.

CHIEF BASS TO BE GIVEN MORE HELP TO ENFORCE LAW

Amother Cop to Be Added

with additional help the chief of police will have more time to give to law enforcement. The commissioners will expect him to look more thorough by into blind tiger charges and to give more attention to traffic regustion.

CHANCES OF FIRST

Have Peer Chance

That the first haby bern has the poorest chance of living and that this is true because mothers use the first baby to experiment on is just some of the facts discovered through a recent study made of infant welfars in Manchester, N. H. This study not only confirmed the statement that being a baby is the riskiest thing a person ever did, but it discovered through that being the first baby was averal these wore able to achieve a lower death rate of first babies was somewhere between 166 and 174. The mothers having learned on their first babies were able to achieve a lower death rate for the ascend, third, fourth, and fifth. Then, the improvement came to a halt and the enrye began to ascend. The death rate order of birth was 250. The later babies where the baby was the first among babies in these very large families do not stand a good chance of living.

Another interesting fact brought out in this study of baby life was that of very young mothers had a high deathrate. The death rate of babies where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother was under 20 was 241. Where the baby was the first and the mother of this was due to the fact that they were sturdy bables. Part of it was due to the fact that the mothers 30 to 25 years of age had the best chance of Hving. Part of this was due to the fact that the mothers and the mother of the surface of the Suice Credents to be annulated.
