L. H. Exwell was a visitor to Raleigh Sunday.

Lawrence U. Bizzell spent Sunday with relatives in Goldsboro.

Rev. James M. Daniels was a visitor to Wilmington Monday.

Miss Louise Con. of Goldsboro, is here to visit Miss Gladys Young.

Ernest F. Young is on a trip to Raleigh and several other towns this week.

Mrs. T. I. H. Young, of Smithfield, is here to visit her daughter, Mrs. F. Smith.

Miss Laura Shull left today for Asheville to spend several days with relatives.

Mrs. Ora Patton returned Monday from Wando, Hatteras and Washington.

Miss Agnes Cannaday, of Oxford, was here yesterday to visit her father, George L. Cannaday.

John C. Hodges left Monday morning for Greensboro, where he will spend several days on business.

James Kirby, who is employed in the Hood & Grantham store here, visited relatives in Kenly Sunday.

Mrs. Ardie Rowland, of Franklin Springs, is here for a several week's visit to Miss Lavene Taylor.

Sing Jung, laundryman, who is now a next door neighbor of The Dispatch, spent Sunday with friends in Raleigh.

Mrs. Martha Warren has returned from Spring Hope where she had spent several days as the guest of friends.

Ralph R. Koons spent last week end in his office here. He is traveling the east in the interest of his fertilizer business.

Mrs. W. A. Gasque returned home Monday. She had been a patient in Pittman Hospital, Fayetteville, for several weeks.

Miss Emma Young, of Smithfield, is here to visit her sister, Mrs. F. Smith. She taught in the schools of Burlington this year.

Mr. and Mrs. Eugene Parker returned yesterday from Asheville, where they had spent several days enjoying the mountain climate.

Mrs. M. J. McNair and her daughters, Misses Alice and Marguerite, of Wake county, are here to visit Mrs. McNair's grandmother, Mrs. Mary C. Shill.

Charles C. Butler has just returned from a trip through Sampson and Pender counties. While he was away he visited White Lake. He says crops were never better than they are now in the sections visited by him.

Charles Marshall Ford returned to Wilson Monday after spending several days here with relatives. He came to attend the wedding of his niece, Sadie Ford Pittman to Ed. Myler Jamison, which occurred Saturday night.

A birthday dinner will be held at the D. L. Tart home Tuesday, August 10. John Tart, under whose direction the event will be held, invites all relatives and friends and admonishes them to come with well-filled baskets.

Mr. and Mrs. Almon Turnage, of Banner Township, Johnston county, were shoppers in Dunn today. Mrs. Turnage had a look at Craig's new bakery and was much impressed with the way the men down there do their cooking. She says she will cook no more cakes as long as she can get the things ready fixed up.

The Parrish-Driver Company desires that The Dispatch inform the public that it has sold none of its business except the automobile repair department. It still is engaged in the sale of musical instruments and automobiles. Through the sale of the repair department to Martin and Broughton the report that they had sold the entire business became current. Jim Driver said yesterday that the company was just beginning to do business in earnest.

Water Supply Then and Now

From the ancient Egyptian water wheel to the modern automatic electric pump is a long stretch, but both of these pieces of machinery illustrate an institution which has had its existence throughout history wherever there has been any degree of civilization. The Egyptian along the Nile used the clumsy water wheel to lift water over the bank of the river and irrigate his fields. In small towns and cities the water supply consisted of a system of carriers who used pack animals bearing water bags made of skin. The Romans solved the matter of water supply by conducting the water for miles across the country in aqueducts.

Throughout history wherever men have established anything like a civilized community they have made an effort to organize and improve the matter of water supply.

In the American farms this question has always of great importance. The needs of live stock, of the household and frequently of irrigation have made it imperative to have a well developed water supply on the farm. Usually, of course, it comes from wells, and in the old days these wells were served by buckets placed on the end of long sweeps which constituted a very clumsy and inefficient method of raising the water from the well. Later came the old wooden hand pump which wasn't much better and later still the iron pump and the wind mill. This last was the first application of power other than human to the pumping of water. On a great many American farms all of these older methods have been supplanted by the automatic electric pump which works silently and efficiently twenty-four hours in the day. It draws water from the well and stores it under pressure in a tank from which it runs to faucets all over the house and barn. When a certain amount of water is drawn out of the tank the pump starts automatically and pumps in more water until the rising pressure stops it. Thus finally the whole matter of water supply has been taken off of the farmer's mind and turned over to the best of modern service, electricity.

And of course the same electricity which does the pumping, lights the house, does the milking, the sweeping, the washing, the churning, the separating and a hundred other farm tasks.

An Active Partner

An International Kerosene Engine will be an active partner in all your farm work. Watch how it handles your little jobs month after month with low-priced power, making your burdens lighter and giving you time for thought in "putting over" plans for making your farm yield bigger crops.

You cannot beat an International kerosene engine for economy or efficiency. It works on the cheapest engine fuel you can buy — kerosene, and uses just enough of that to handle the job in hand.

The International engine is built to meet your needs. Material and workmanship are of highest quality — the International standard. It is very simple in design and easy to operate. It is a kerosene engine, pure and simple, made to stand the hardest usage.

Then comes the very important matter of service and repairs. A nearby branch house equipped for any emergency call is always ready to help us help you. For 55 years International service has been a household word for steady, ready, courteous, complete help in time of need.

A close inspection of this engine is going to convince you that it's a good farm partner to have. Come in and see it.
