How The Master Driver Became Master Tire Builder

TN 1903, driving the "999" racing car, Barney Oldfield started his career of victories that later carbed him the title of "Master Driver of The World." To obercome the dra weaknesses that made racing difficult and dangerous, he studied tires-specified in sterals supervised construction.

Today, Barney Oldfield . mown as the "Master Tire Builder." Starting with the crude tire which seconds, Oldfield gradually developed his famous Cordinal set of which covered 600 miles as eighty-eight miles an hour without a change.

In three years Oldfield free have won every important race on American speedways. They are the only

first place in the French Grand Prix. They have won for three consecutive years in the 500-mile Indianapolis Sweepstakes. So far in 1922, Oldfields have lowered four World's Records and seven track records.

The Wichita Test Run gave evidence of Oldfield superiority in touring-when a set of four Cords covered 34,525 miles over rutted, frozen, winter roads-a performance attested by the Mayor of Wichita.

See your dealer and get a set of these rugged tires that Barney Oldfield has developed and perfected through a flietime of practical tire experience. Their performance will convince you that they are "Most Trustworthy Tires Built."
