

Spuds Are Scarce Again

You will not be able to eat so many potatoes this year and on an average you will have to pay more for what you eat, according to the Sears-Robinson Agricultural Foundation. While there will be 25,000,000 bushels more potatoes than last year, the prospective crop of 352,000,000 bushels is still 20,000,000 short of the five-year average. Farmers devoted \$2,202,000 to the potatoes this year, the Foundation finds, and according to the latest of

field reports, these should yield on the average 110 bushels per acre. In 1925 the yield was only 103 1/2, while in 1924 it was 127 bushels. The present prospects are for a crop 15 per cent below normal. Based on studies over a period of 23 years, the Department of Agriculture indicated that prices will be about 37.5 per cent above normal, and while prices are expected to be higher, the extreme high prices of a year ago are not likely.

\$262,896,309 Grain Export—Wheat and Flour Top List

The value of grain and grain products exported from the United States in the year 1926, on the date of 1926, is placed at \$262,896,309 by the Sears-Robinson Agricultural Foundation in a survey of this situation. Wheat and flour topped the list, making up nearly two-thirds of the total. Other exports in the order of value were barley, corn, oats, rye and oatmeal and rolled oats.

Investigation of the export figures makes Canada appear as the second largest receiver of American grain. This is due to the fact that much of the grain is shipped via the Great Lakes and the St. Lawrence river and is cleared to Canadian ports. The bulk of it, however, is destined for Europe. The leading buyer of American grain was Great Britain, with a total of 18 per cent of the total export. Next in order, following Canada, were the Netherlands, Cuba, Germany, Belgium, Mexico and Italy.

The beautiful Riddle color decoration is guaranteed permanent

Riddle Fitments
The standard of home lighting

For replacing old style fixtures—or equipping new homes—Riddle Fitments offer supreme value in authentic styles. Wonderful selection at moderate prices.

NASH
Leads the World in Motor Car Value

Seven Bearing Crankshaft MOTOR

The Ultra Modern Motor
World's Smoothest Type

ONLY Nash of all the great motor car manufacturers offers you the vital advantage of a 7-bearing crankshaft motor in every model.

This is the motor type that engineering authorities concede to be the newest and highest expression of six-cylinder power-plant development.

Come drive one of these new Nash models. See clearly for yourself the utter power-smoothness and power-quietness that this 7-bearing motor gives—by working its performance is as contrasted to older motor types with 3- or 4-bearing crankshaft design.

Don't buy an old-type motor if you're buying a new car.
