HAZELWOOD NEWS

HALLOWEEN CARNIVAL

There will be a Halloween Carnival at the Hazelwood school Friday night, October 27, at 7:30. This plans to be one of the most outstanding and attractive carnivals ever held. There will be a program rendered by a number of "colored folk" which will include a play titled "Whar's My Pants," colored folk songs and string band music. Further attractions will be found in fish ponds, country store, rats and balls, barrel rolling, and also the sale of ice cream, candy, and pop corn. A small admission for the program will be charged of 5 and 10 cents the proceeds of which will go to the P. T. A. fund for the school. Don't miss a good time at the carnival.

VISIT IN BAKERSVILLE

Mr. and Mrs. Sam Knight spent the week-end visiting in Bakersville, N. C.

INTERESTING PROGRAM IN CHAPEL

One of the most interesting and attractive chapel programs of the year was rendered Friday morning by Miss Stringfield, Fifth Grade. The title of the program was "Hiawatha's Childhood." The stage was attractively set as a forest with Hiawatha's Wigwam. The characters were dressed as native Indians. Several musical numbers were rendered. This program grew out of a unit of work based on the study of Indian Life.

VISITS PARENTS

Mr. Bruce Tittle of Detroit arrived last week for a visit to his parents, Mr. and Mrs. John Tittle.

Care In Harvesting Means Better Sweet Potatoes

Success in keeping sweet potatoes through the winter depends on harvesting the crop before the potatoes are injured in the soil, immediate and thorough drying and ventilating after harvest, and maintaining temperatures in storage that will prevent cold injury or excessive drying.

"We overlook the fact that sweet potatoes may be injured by excessive water in the soil in late autumn when the temperature is too low to allow the soil to dry out," says Dr. R. F. Poole, plant disease investigator for the North Carolina Experiment Station. "It seems to be a custom to harvest sweet potatoes in this section immediately following the first killing frost whether this frost occurs in late October or late November. We have found that when the crop is harvested between October 10 and October 20 it will keep better in storage than when harvested at a later date."

Dr. Poole says there are some 20 fungi which cause disease and rot of the sweet potato. Some of these will enter the roots whether they are injured or not, and when the soil conditions are favorable, trouble will follow. This is why the specialist advises digging before the soil becomes water-logged in late fall.

It is poor economy, says Dr. Poole, to store any potatoes that are diseased. Therefore he advises inspecting the roots before storage. None that are broken or cut should be placed in the houses.

Good ventilation in the storage house is also advised. Excessive heat is to be avoided because this not only results in shrinkage but also in poor quality.

No man's feet can ever be made to look so neat as a fashionably shod girl's, but they are always happier, says Bob Turner.

Finger Nail Spots

Occasionally white spots or marks appear on the tips of our nails. These are caused by a lack of proper nutrition from the body, usually the result of sickness and consequent disorders in the blood. The blood, which feeds our skin, likewise feeds the tissue which makes up the nails.
