

COUNTY AND FARM PAGE

COUNTY AGENT W. D. SMITH'S column

All farmers who have not gotten their marketing cards to the county agent's office should do so at once. The work will be delayed until all cards are in. This county is ahead in this work, but we should complete the job at once.

Bee meetings will be held at the following places:

Thursday 9:00 A. M. at Vocational Agriculture Department.
Thursday 4:00 P. M. at George Stamey's home, Pigeon.

Friday 10:00 A. M. at Columbus Moody's home, Margie.

Friday 3:30 P. M. at J. B. Best's home, Crabtree.

Mr. C. L. Sams will be here for these meetings. All men and women interested in bees should attend at least one of these meetings.

Remember the meeting at the court house Saturday morning at 10 o'clock—it is important that you be present.

Trap Catches Boy Stealing Apples

TRAP CATCHES BOY

Detective Vincent Bradley answered a call that said someone was screening on North Lexington Avenue in Asheville Saturday.

When he arrived, he found a 19-year-old boy on his knees in front of a screened fruit stand. One of the 1933 apples were through the mesh with a thumb caught in a trap which had been set there to catch possible thieves.

With the assistance of two men, the officer released the kid who said: "I was hungry and just tried to get an apple."

Bradley concluded the boy as he missed a lacerated thumb, took him to a café, and gave him food. Then he took his young prisoner to within two blocks of home and released him.

"Please, Mister," the youngster

Timely Questions And Answers On Farm Problems

Question: Is the science of selecting dairy cattle practical for the average mountaineer?

Answer: A high degree of specialization has been attached to specialists of the U. S. Department of Agriculture in this work but due to extreme care necessary in making out the system of little value to the average mountaineer. For the commercial hatcheryman, however, an opportunity is offered in that a definite premium will be offered to the hatcheryman who can produce a run of high quality per cent females.

Question: When should apple trees be sprayed for codling moth?

Answer: The trees should be sprayed as soon as the blossoms are open. The irregular branching varieties will require more than one application of the spray. The removal of all infested twigs, branches and blight cankered areas will also aid in the control by eradicating carry-over sources of the organism. For the spray use a Bordeaux mixture consisting of one pound of granulated blue stone, three pounds of elemental hydrated lime and 50 gallons of water.

Question: Is silage a profitable summer feed for dairy cattle?

Answer: Silage has its place in summer feeding as a supplement for short pasture. Where there is sufficient silage or where the silage crop yields well it is a cheap and more convenient supplement than soiling crops. It is also well to feed a reasonable amount in the morning for the first few days after the animals are turned on the pasture. This prevents the cows from gorging on the young tender grass which tends to scour the cows.

Hogs Need Pasture For Proper Growth

Green grazing is essential to the development of hogs yet they cannot thrive on pasturage alone, says Earl H. Hostetter, head of the animal husbandry research at State College.

Southern swine growers have an advantage over their northern neighbors, he said, in the year-round pastures which can be maintained in the warmer regions.

Pigs which have had access to succulent grazing before the fattening period will put on weight even when fed the concentrated fattening feed in a dry lot.

But those which were not supplied with green grazing before the fattening period, in recent experiments under Hostetter's supervision, failed to gain weight normally and finally died when not provided with green feed, legume hay, or cod liver oil.

Temporary grazing is especially valuable to sows which are suckling pig litters, since it is during this period that young pigs are liable to become infested with worms and other parasites. A fresh pasture that has not been grazed by swine in some time will decrease the danger of infestation.

Young pigs should not be allowed to graze in pastures along with older hogs, as the mature animals may infect the pigs although not apparently suffering from the parasite themselves.

Hostetter says that continuous temporary grazing can be provided throughout the year in eastern and Piedmont North Carolina by seeding abuzzi rye and crimson clover from the latter part of August to September 15, spring oats or dwarf Essex rape from February 15 to March 15, and successive seeding of soybeans from May 15 to July 15. The soybeans will be ready for grazing when six inches high.

Drunks Are Fined Dose Of Castor Oil

Two men charged with drunkenness stood before J. M. Mauldin in recorder's court in Greenville, S. C.

"Which had you rather do?" asked Judge Mauldin, who was substituting Recorder Wyatt Aiken. "Serve 30 days on the gang or take a dose of castor oil?"

"Why, take the oil," both men said. So a policeman went into the health office and brought back a bottle of oil. Both men downed a tea cup brimming full without a grimace.

"May we go now?" they asked.

"Yes," said the court, "run along."

pleaded, "don't tell my folks. I won't ever do anything like that again."

"They won't know it if you don't tell them," the detective said.

Mother: "I've tried hard to make you a good child, Dorothy, and yet in spite of all my efforts you are still naughty."

Dorothy: "What a failure you are as parent, aren't you, mother?"

"FIRST LOVE"—Opening chapters of a stirring new novel of marriage and money, by Loree B. Elkin, appear April 15 in the American Weekly, the big magazine which comes with the BALTIMORE SUNDAY AMERICAN. Buy your copy from your favorite newsdealer or newsboy.

Waynesville First Methodist

Pastor Harold J. Patten

A. T. Mauldin went to press Mr. Patten was out of town. He announced before his departure that regular services would be held Sunday at the usual hours with the pastor preaching at both the morning and evening services.

The public is cordially invited to attend all services.

"Did you get my check?"
"Yes, twice. Once from you and once from the bank."

NOTICE OF TRUSTEE'S SALE

On Monday, April 30, 1934, at eleven o'clock A. M. at the court house door in the town of Waynesville, Haywood County, North Carolina, I will sell at public outcry to the highest bidder for cash the following described lands and premises, to-wit:

BEGINNING at a stake on the West side of Brammer Avenue it being the Northeast corner of the lot herein conveyed, and runs North 44° West with the line of lot No. 163, 12 poles and five feet to a stake 7 feet from the corner of lot No. 173; thence S. 44° E. 12 poles and 5 feet to a stake on the West side of Brammer Avenue; thence along Brammer Avenue, 95 feet to the BEGINNING, it being lot No. 164, in the new plan of and town of Waynesville, as per Ram-ear Survey, the map of which is of record in Book "R," page 597, has seven feet strip between the lot herein conveyed and the Norwood lot.

Being the same lot of land conveyed by A. B. Bryan and wife, Eula Bryan to S. K. Miller, by deed dated June 2, 1913, and recorded in Book 23, page 582, Record of Deeds of Haywood County.

Sale made pursuant to power of sale conferred upon the undersigned trustee, by virtue of a deed of trust executed by S. K. Miller dated December 25, 1925, and recorded in Book 25, page 75, Record of Deeds of Trust of Haywood County.

This 10th day of March, 1934.

M. G. STAMBEY, Trustee.

AFTER 8,000 MILES 93% AS STRONG AS NEW

Miles Run	Supertwist Cord	Ordinary Tire Cord
8,000	93%	52%
16,000	81%	36%

Supertwist Cord—a Goodyear patent—stretches, absorbs shocks, and comes back strong! Thoroughly rubberized to resist heat, it gives lasting blowout protection in every ply. Ask us to demonstrate!

The super-soft tires the new 1934 cars are wearing can be easily applied on most 1933 or 1932 cars. Ask for our special offer on the GOODYEAR AIRWHEEL.

Any good new tire is pretty safe from blowouts—but how safe is it after thousands of miles? Think over those percentages above! Remember, the public finds that Goodyears stand up longest—that's why more people buy Goodyears than any other tires. Since Goodyears cost nothing extra, put them on your car!

The famous Goodyear Pathfinder—blowout-protected by 4 FULL PLYS of Supertwist Cord insulated with heat-resisting rubber. \$5.70 up.

Also, the Goodyear Speedway—blowout-protected yet costs as little as \$4.10 up.

Prices subject to change without notice and to any State sales tax.

We have just added a complete new line of RAY-BESTOS BRAKE LINING. We have the type that each car manufacturer recommends for each make of car. This is something new in the automobile industry—let us explain it to you.
