Timely Questions And Answers On Farm Problems

Question: Present prices of eggs do not justify feeding my entice flock, What should be done? Answer: The flock should be culled and all low producing birds taken from the flock and sold. A number of birds in all flocks are now becoming unprofitable and this number will in-creased as the season advances. The broody birds should be removed. The broady birds should be removed. The practice of culling will materially lower the feed bill. Extension Cicular No. 156 on "How to Cull" ex-plains the method in detail and copies will be mailed free on application to F. H. Jeter, agricultural editor at State College.

Question: What should crimson clover and hairy vetch be turned for best results?
