Men Fall Out, And Plane Continues To Fly Over Ohio City

Massillon, O.—Two men fell to their death from an open-cockpit plane here late Saturday and the pilotless ship circled the city crashing 400 yards from the men's bodies.

The two victims were Albert Meyer, 31, manager of the Mason airport here, and John Burwell, 29, of the Massillon police department. As the plane went into a spin at an altitude of 2,000 feet their safety belts broke and they were hurled to the ground. Neither had a parachute.

Upside down, the plane headed straight for the Massillon business district at a high rate of speed, then veered and spun to the ground near the hotel.

The plane was demolished and the bodies of the men were buried about two feet in the ground.

Long - Used Laxative

To be bought and used as needed for many years, speaks well for the reliability of Theford's Black-Draught, purely vegetable family laxative. Mr. C. E. Ratliff writes from Hinton, W. Va.: "My wife and I have used Theford's Black-Draught thirty-five years for constipation, — tired feeling and headache. I use it when I feel my system needs cleansing. After all these years, I haven't found anything better than Black-Draught!"

"43% MORE NON-SKID MILEAGE"

"You're too modest!"

Motorists who got the first G-3's put out—months before the public announcement—say; "You're too modest!" Many of them report 50% to 100% more non-skid mileage. Why, then, do we insist on only 43%? Well, 43% is a definite test-car-proved figure. Very likely it is low for normal use—because the tests which established the 43% average were gruelling, speeding up to 50, jamming on brakes, day and night. Very likely motorists will get more than 43% more non-skid mileage. But we'll string along with 43%—because it's plenty to deliver at no extra cost. Come see the tire that's the talk of the nation.
