

ADMINISTRATOR'S NOTICE

Having qualified as administrator of the estate of J. R. Redmond deceased, late of Haywood County, North Carolina, this is to notify all persons having claims against the estate of said deceased to exhibit same to the undersigned at Clyde, North Carolina, or at Waynesville, N. C., on or before the 20th day of September, 1935, or this notice will be pleaded in bar of their recovery. All persons indebted to said estate will please make immediate payment.

This 19th day of September, 1934. CHAS. B. McGRARY, Administrator of J. R. Redmond Estate.

No. 255—Sept. 20-27-Oct. 4-11-18-25—paid.

NOTICE OF TRUSTEE'S SALE

Monday, October 29, 1934 at eleven o'clock A. M. at the court house door in the town of Waynesville, Haywood County, North Carolina, the undersigned trustee will sell at public outcry, to the highest bidder for cash, the following tract or lot of land, lying and being in the town of Hazelwood, Haywood County, North Carolina, and,

BEGINNING at the Northeast corner of a stone pillar in the Northern building line of Balsam Road (State Highway No. 10) L. N. Davis corner, and runs thence with L. N. Davis line, N. 32° 5' W. 63.8 feet to a stake; N. 42° W. 29.1 feet to a stake; N. 54° 34' W. 112.6 feet to a stake in L. N. Davis line (being line of lot sold to Fred L. Safford, Book 63, page 48; thence running with line of said lot N. 14° E. about 124 feet to a stake in the Southern margin of Poplar Street; thence with the Southern margin of Poplar Street, S. 73° 15' E. 164 feet to a stake, W. A. Shoobred corner; thence with Shoobred line, S. 50° 45' W. 110 feet to a stake; S. 39° 15' E. 175 feet to a stake in the Northern margin of Balsam Road (State Highway No. 10); thence with said margin of said road, S. 50° 45' W. about 98 feet to L. N. Davis corner, the BEGINNING.

Being a part of the property conveyed to the said parties of the first part by J. M. Long. Sale made pursuant to power of sale conferred upon the undersigned trustee by virtue of that certain deed of trust executed by W. D. Blalock and wife, Allie Blalock, dated October 19, 1931, and recorded in Book 23, page 252, Record of Deeds of Trust of Haywood County. This the 28th day of September, 1934.

J. R. MORGAN, Trustee. No. 257—Oct. 4-11-18-25

NOTICE OF SALE OF LAND

Under and by virtue of the authority conferred by Deed of Trust executed by Ralph W. Davis and wife, Cora Davis and dated the 1st day of September, 1927, and recorded in Book 21, Page 165, in the office of the Register of Deeds for Haywood County, V. S. Bryant, Substituted Trustee, will at twelve o'clock noon on TUESDAY, OCTOBER 22, 1934, at the Court House Door of Haywood County in Waynesville, North Carolina, sell at public auction for cash to the highest bidder, the following land to-wit:

A certain lot or parcel of land in or near the Town of Waynesville, County of Haywood and more particularly described as follows: BEGINNING on a stake on the Easterly margin of Hazel Avenue, (formerly Church Street) said stake being Robert McKelroy's Northwest corner and runs with the margin of said Street North 6 degrees West 90 feet to a stake; thence North 83 degrees East 150 feet to a stake in Kuykendall's line, (this being the old J. F. Bass line); thence with said line South 6 degrees East 90 feet to a stake, McKelroy's corner, thence with McKelroy's line, South 83 degrees West 150 feet to the Beginning.

BEING the same lot of land conveyed to Ralph W. Davis et al. by deed dated September 28, 1922, from T. H. Worsham and wife, Annie Worsham, and recorded in Deed Book No. 62, page 99. This sale is made on account of default in payment of the indebtedness secured by said deed of trust, and is subject to all taxes and assessments against said property whether now due, or to become due. A five per cent (5%) cash deposit will be required of the highest bidder at the sale.

This the 27th day of August, 1934. V. S. BRYANT, Substituted Trustee. Loan No. 335, No. 246—Sept. 27-Oct. 4-11-18.

NOTICE OF TRUSTEE'S SALE On Monday, October 29, 1934, at eleven o'clock A. M. at the court house door in the town of Waynesville, Haywood County, North Carolina, the undersigned trustee will sell at public outcry, to the highest bidder for cash, the following lands and premises lying and being in the town of Waynesville, and more particularly described as follows: BEGINNING 550 feet from the corner of Walnut and Hazel Streets, North Waynesville Addition on the North side of Hazel Street running N. 10 1/2° E. 175 feet; thence S. 82 1/2° E. 100 feet; thence S. 10 1/2° W. 175 feet to Hazel Street; thence S. 82 1/2° W. with Hazel Street, 100 feet feet to the BEGINNING, containing 17,500 square feet.

Being the same property described in deed from Roberta Stevenson, et al. to Minnie B. Stevenson, dated the 24th day of November, 1923, and recorded in Book 65, page 400, Record of Deeds of Haywood County. Sale made pursuant to the power of sale conferred upon the undersigned trustee by virtue of that certain deed of trust executed by C. F. Kirkpatrick and wife, Georgia M. Kirkpatrick, dated January 12, 1927, and recorded in Book 11, at page 235, Record of Deeds of Trust of Haywood County. This the 28th day of September, 1934. GEO. H. WARD, Trustee. No. 259—Oct. 4-11-18-25

Ford Believes In Giving Customers Continued Service

Shortly after he began to build automobiles, Henry Ford made this pronouncement: "We have always believed that a sale does not complete the transaction between us and the car buyer, but establishes a new obligation on us to see that his car gives him good service."

That ideal of a continuing obligation to give good service to its customers, which has been the guiding principle of the Ford Motor Company in all its relations with Ford car owners for 30 years, finds new and eloquent expression in an original system of parts distribution, recently inaugurated by the Ford Motor Company, whereby Ford car owners living in the smallest communities are extended the same prompt and efficient service that those who live in populous centers are accustomed to receive.

This system, devised by Ford and unique in the automotive industry, involves the daily employment of more than 600 distributors' vans, calling regularly on the 100,000-odd independent garage owners throughout the United States and directly supplying their needs of genuine Ford parts at discount on material as well as labor. And not only can he profitably supply his customers with genuine Ford parts; he himself is supplied with every facility to push their sale—porcelain and enamel signs, telling the world that here "Genuine Ford Parts" may be obtained, lubrication and maintenance charts, and all the printed matter issued by the company to increase the dealer's knowledge and sales of Ford cars, trucks, parts and accessories.

Briefly, the way the system operates is this: Each of the 32 Ford branches divided its territory into sections, the number based on the number and importance of independent garages each included, appointing a dealer to act as distributor in each section. Thus, the Atlanta Branch, for instance, which has some 224 Ford dealers, has 20 distributors, whose panel trucks call on every garage in the area allotted to them at least once a week, selling them directly the "fast moving" items they need, taking orders for heavier parts and leaving with them lists of the items carried in the delivery truck and self-addressed postal cards on which they can order additional parts to be delivered on the next call. These Ford V-8 panel vans, specially designed for the services they perform, are identical in appearance and their sleek low bodies, painted in blue and cream, add a distinctive and colorful note to the moving stream of motor vehicles that form the traffic patterns of the land.

The press often omits an important feature of a news story. It never did tell us, for instance, what became of the rattlesnake, poor thing, that bit the evangelist.

Timely Questions And Answers On Farm Problems

Question: What can be done to control colds in the poultry flocks?

Answer: Where only a few birds have colds, prompt isolation will probably check the outbreak. The cause of the trouble, however, should be eliminated. This is usually caused by drafty or poorly ventilated laying houses or by the unsanitary conditions. Check the ventilation and close all cracks and holes that will cause a cross draft. An effective germicide should be kept in the drinking water at all times, and the entire flock should be given a dose of epsom salts at once at the rate of three-quarters of a pound of salts to two and one-half gallons of water. This treatment, together with strict sanitation will do much to control the trouble.

Question: Do tobacco stalks and stems have any fertilizing value?

Answer: Yes. There is a certain percentage of nitrogen, phosphoric acid and potash contained in both stalks and stems. The potash content runs from 4 to 8 per cent and the nitrogen runs from 2.0 to 3.5 per cent. The phosphoric acid content runs less than one-half of one percent. In addition to the fertilizer value the plowing under of stalks and all tobacco refuse will also aid in the control of many diseases and insect pests.

Question: Should rose bushes be planted in the spring or fall?

Answer: In sections where the temperature does not go below 5 degrees F. fall planting is best. Plants set this time usually make a good growth the first season. The planting, however, should not be done until the leaves have fallen from most of the trees and shrubs and only field-grown, dormant plants should be set. Where the temperature falls below 5 degrees, spring planting is best. Time and method of planting the most popular kind of roses together with other information is given in Extension Circular 200, "Home Culture of Roses," copies of which may be had free upon application to the Agricultural Editor, State College.

Question: Is it possible to cure corn lamb as you do pork or beef?

Answer: Yes. The shoulders and legs, however, are the cuts most generally used. For each ten pounds of lamb use 1 1/2 cups of salt, 1/2 teaspoonful of baking soda, 1 table-spoonful of salt-peter and 3/4 cup of brown sugar. Rub salt thoroughly into the meat and allow to stand for 24 hours. Dissolve the other ingredients in a small quantity of lukewarm water and pour over the meat. Add enough water to cover the meat and let stand in the brine for three or four days. Care should be taken to avoid using too much salt.

Allen's History Of County About Ready For Printer

W. C. Allen, author of the forthcoming book "The Annals of Haywood County," stated this week that the manuscript is ready for the printer with the exception of a few revisions and additions. He stated the principal delay now is from a financial reason. The required number of advance orders have not been received as yet, and the contract with the publisher cannot be closed until at least half of the contract price is in hand.

Mr. Allen further stated that the orders are coming in, but not fast enough to guarantee the publication of the book before Christmas unless there is a considerable increase in orders within the next week or two. Canvassers cannot be employed yet as the board of directors are pledged to hold every penny of the advance orders in bank until enough money is paid in to guarantee the publication of the book.

It is, therefore, urged, Mr. Allen said, that every person who wishes a copy of the first edition, send in the initial payment of \$1.50 either to J. R. Boyd, treasurer, to the author, W. C. Allen, or Mrs. T. L. Gwynn. The number of copies issued will be determined by the advance orders received. At present, it does not seem advisable to have more than one edition issued.

It is very necessary that everybody, who wants a copy, get in touch with either Mr. Boyd, Mr. Allen or Mrs. T. L. Bwyn, without much delay.

Earth Furnishes Source of Music for Bolivians

A land of sheer mountain peaks, with towns and villages situated so much nearer heaven than there ever is heard a clamor for fresh air, Bolivia should live a life strangely apart, in some respects, from other corners of the globe.

The traveler roaming through the interior will find many strange things. One will hear music in an Indian village, but the music will not be as strange as the instrument. Close analysis will show that old Mother Earth basically furnishes the source of music. In New York you hear jazz bands with brass instruments—the brass furnished by Mother Earth. But in Bolivia the natives don't bother to dig below the surface. They shape their instruments from what grows out of the soil.

The sumpna is the favorite musical instrument of the Bolivians. It is made from varying sized reeds. It is a magnified form of a roudolero so popular in Ecuador. Much of the music heard in the Indian villages in this region is of melodies handed down for centuries—bits of ancient Inca and pre-Inca tribal songs, chants used in making supplication to the sun god and melodies which accompanied the ritualistic dances given to placate the gods of the earth and the harvest.

Diseased Cattle Menace To Herd

Studies made by the North Carolina experiment station and the veterinary division of the state department of agriculture are helping dairymen rid their herds of Bangs disease, according to Dr. C. D. Grinnells, in charge of dairy research at State College.

Veterinarians and dairymen over the state have been working with the experiment station and the veterinary division during the past five years, he said, and deserve credit for much of the work done.

The only way now known to eliminate the disease is to remove from the herd all animals which are infected. This means that dairymen have frequently had to slaughter some of their best animals. Dr. Grinnells said, but they have made the sacrifice in the interest of the future.

At present there are about 115 herds in the state which are known to be free from the disease, including 55 which are complying with the regulations governing the award of accredited herd certificates.

To aid in the fight against the disease, which is sometimes known as contagious abortion, the U. S. bureau of animal industry is now paying indemnities to dairymen who sign agreements to comply with the regulations that infected animals be slaughtered, that safeguards be ex-

Mr. Roosevelt was not entirely in accord with Mr. Sinclair unless he changed him two days for entrance into Hyde Park.

Taking a crack at the New Deal may allow some forgotten Democrats a chance to get a few rays of the limelight.

Attraction of Earth

It has been calculated that were an object to be thrown from the earth with a velocity of five miles per second it would leave the earth entirely and become a satellite of the earth. If the velocity were increased beyond five miles per second the object would continue to revolve around the earth in an elliptical orbit whose width would increase with the velocity until a velocity of seven miles a second was recorded, when the object would fly off on a parabolic curve, escaping the attraction of the earth and becoming a satellite of the sun.

Increased in the purchase of new animals, that good sanitation be maintained, and that herds be restocked so that any reinfections may be discovered.

Under the agreements, the government will pay not more than \$20 a head for grade animals and not more than \$50 a head for registered, purebred cattle. Dr. Grinnells said, The owner will be allowed to keep the salvage of the animal slaughtered.

Unique Vicks Formula Is Now Aiding Millions In Preventing Many Colds

Vicks Va-tro-nol, the unique aid in preventing colds, is now helping millions of adults and children to enjoy greater freedom from colds.

Va-tro-nol is especially designed for nose and throat, where most colds start. Va-tro-nol should be used at that first sneeze or nasal irritation—just a few drops up each nostril. Its timely use helps to prevent many colds—and to throw off colds in the early stages.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh)—Va-tro-nol penetrates deep into the nasal passages—reduces swollen membranes—clears away clogging mucus—brings comforting relief.

Va-tro-nol is powerful yet absolutely safe—for both children and adults. It has been clinically tested by physicians—and proved in everyday home use by millions.

Note: The remarkable success of Vicks Drops—for nose and throat—has brought scores of imitations. The trademark Va-tro-nol is your protection in getting this exclusive Vicks formula. Always ask for Vicks Va-tro-nol. Now in two generous sizes—30c and 50c.

Va-tro-nol and its companion product, Vicks VapoRub (the modern external treatment for colds) form the basis of Vicks Plan for Better Control of Colds—fully explained in each Vicks package.

CLOTHING For Men and Boys C. E. Ray's Sons A COMPLETE CLOTHING SERVICE

A DOZEN GOOD REASONS for owning a FORD V-8

IT is unnecessary to resort to adjectives in describing the Ford V-8. To understand its value you merely have to look at its features—and find out how much they ordinarily cost. A dozen of them are listed below. Study the Ford V-8 point by point. Discover the engineering advances that have made it one of the finest performing cars on the road. And discover comfort that you would hardly believe so little money could buy. Drive the Ford V-8. And while you thrill to its pick-up, its power and its luxury, remember that it is the most economical car to operate Ford has ever built.

FORD RADIO PROGRAM—SUNDAY AND THURSDAY EVENINGS—COLUMBIA NETWORK

Advertisement for Ford V-8 listing features: Houdaille 2-way Shock Absorbers, All Steel Body gives Maximum Safety, Single Pane Clear-Vision Window Ventilation, Extracost of next Car with Dual Down-draft Carburetion \$290.00, The Only Car Under \$2500 with a V-type 8-cylinder engine, \$505 AND UP F.O.B. DETROIT, Aluminum Cylinder Head, 5 1/2 Gallon Cooling System, 3/4 Floating Rear Axle with Straddle-mounted Pinion Exclusive on Ford, Torque-tube Drive Found in no Other Car Under \$795.00, Completely Water-jacketed Cylinders and Upper Crankcase Walls, The Only Car Under \$3200 with welded steel spoke wheels.
