Grouse Season To Open Nov. 20 And Last Until Dec. 10

Hunting License In County Expected To Reach \$1100 For The Season, Says Burnett

G. W. Burnett announced this week that he had received a ruling from J. D. Chalk, commissioner of game, that the grouse season for this section had been set from November 20th to December 10th, both dates included. The bag limit is four a day and twelve a season.

Present indications are that this will be the best hunting season in years in this section, according to Mr. Burnett. He said he believed the hunting license revenue from Haywood alone would amount to at least \$1400, there being over half of that already paid.

The total revenue from fishing in Haywood this year amounted to \$1054, he said. The new combination rate of \$4 which grants the privilege of fishing and hunting all year has been responsible for an increase in revenue, it was pointed out. The regular license was 60c county and \$2.10 state for each of the sports, unless under the combination rate.

Haywood County Hospital Is On Approved List

Is One Of 65 Hospitals In State To Receive Recognition By National Organization

Dr. Franklin H. Martin, founder and director general of the American College of Surgeons, in presenting the seventeenth annual report which included the Haywood County Hospital as one of the approved institutions in the United States and Canada, stated:

"Hospital care in the United States and Canada as a whole, during the economic conditions of the last five years, has shown a most gratifying improvement in service. Hospital care approved by the American College of Surgeons have been successful in their determination to provide efficient care for the sick and injured."

Dr. Martin explained that a hospital to obtain approval must comply with certain definite requirements laid down by the American College of Surgeons. These include particularly the maintenance of organized medical staffs of efficient competent physicians; complete and up-to-date facilities; adequate laboratory and X-ray facilities; and a thorough review and analysis of the clinical work of the hospital each month so as to carefully check up the results of the professional activities within the hospital, analyze, and seek to improve them. It is the aim of the American College of Surgeons to assist the medical profession and hospitals in attaining to patients the best possible care.

Of 3588 hospitals of 25 beds and over in the United States and Canada which were included this year in the survey of the American College of Surgeons, 2489 won a place on the approved list.

Two significant facts of much importance to the public are revealed in this year's survey, says Dr. Martin. "The death rate in hospitals is even lower than of last year, and the period of hospitalization has been shortened. Results have improved despite the fact that patients coming to hospitals today are in more advanced condition than in former years because of urgent economic conditions. More efficient medical and hospital services are available through a material reduction in the number of patients in inoperable condition."

Medical and hospital services of making decided headway in the battle against disease, and accomplishing truly wonderful achievements in the early loss of the health and happiness of humanity."

Trio Break Out 23 Window Lights Here While Drunk

Just what will happen next, is the question for Lutherals as asking each other. Late Tuesday night two women and a man drove about Waynesville and Haywood and broke out 23 of 23 window panes. The peculiar part of the whole episode was that they used their bare fists to pound out the glass.

Night policeman Phillips and Deputy Constable John Keeley gave the trio a chase and after four o'clock the two women were caught and lodged in jail. Officers had a warrant and were looking to the man who was said to have been from Georgia. Both women are well known here.

Constable Keeley said that he found where they had stopped their car at each place, and found blood from the broken glass in the car, and after the arrest found blood in the car.

The three were drunk, it was said. Another question yet unanswered is: "What kind of liquor did it take to put them in such a frame of mind?"
